Of the above hybrids, totalling not less than sixty, only two have been recorded from Canada.

These are *V. cucullata* x *septentrionalis* and *V. fimbriatula* x *septentrionalis*.

V. CUCULLATA X SEPTENTRIONALIS.

This hybrid was first described by Dr. Greene¹¹ as *V. melissaefolia* from specimens collected in 1902 by Mr. L. W. Watson on Prince Edward Island. Its hybrid nature was, however, later recognized by Dr. Brainerd, who also states that plants belonging to the same combination, have been collected by Dr. J. Fletcher at St. Stephen, N.B.¹²
