

McClary's Famous Hot Air Blast Heaters

BURN HARD, SOFT
OR SOURIS COAL

This stove has been constructed especially for the Trade of Manitoba, the Northwest Territories and British Columbia.

By the arrangement of the Air Inlet at the top of stove and the position of smoke-pipe collar and damper, smoke is made to pass through the fire and be consumed.

A ventilator in the top inlet keeps gas from accumulating. The air passing at the top being first heated brings about the most perfect combustion possible, as it supplies a fresh discharge of oxygen at the very point of combustion. The amount permitted to go through the fire can be accurately regulated by the Air Inlet.

The down draught in this heater warms the floor, where the heat is most needed, and in this respect it is superior to a base burner. It practically consumes its own smoke.

Is supplied with Nickel-plated Fancy Swing Top, Air-Tight Screw Damper, Direct and Indirect Drafts.

A Powerful Heater and a Great Saver of Fuel
