## SCIENTIFIC AND SANITARY.

Hard water may be softened by boiling a small vial in a kettle of water. The carbonate of lime will become encrusted on the bottle.

Indelible ink stains on cotton or linen, may be removed by saturating the spot with tincture of iodine and then washing the part with ammonia water.

Extensive falls of cliff continue to occur along the Thanet coast, England. At Margate, the falls of late have been very heavy, and a scheme has been mooted for the building of a sea-wall. Broadstairs and Ramsgate have also suffered.

The fastest side-wheel steamer in the world is probably the new Belgian mail boat, *Leopold II*, running between Dover and Ostend. She was built by the Denny Bros., Dumbarton, Scotland; and on her trial trip showed an average speed of 22.16 knots.

The best ligature for a wounded limb that is bleeding freely, is a strong rubber band applied above the injury. All shops and ships, or any place where there is machinery in operation, should keep a supply of bands on hand. They may save lives. Fine rubber tubing answers the same purpose.

To remove grease stains from mahogany, try rubbing the wood with vinegar and water. Should this not prove effectual, then make a weak solution of aquafortis or oxalic acid and water. Rub the stain with a cork, dipped in the liquid, until the marks are removed, after which wash with water and polish with any polishing paste.

We have a rose bush which produces flowers from the centres of others. Such a one was cut and placed in water after the petals of the lower rose had been removed. In a short time six roses developed from a short stem rising from the centre of the old blossom. Three of these were perfect.—Plainfield, N. J., letter in Science News.

A French scientist, M. Piotet, has been experimenting, and has succeeded in producing the extraordinary low temperature of 491 degrees Fahrenheit below the freezing point, a degree of cold almost incalculable to our senses. These researches are not simply matters of scientific curiosity, but are of substantial use, since they open new fields of chemical research.—Engineering and Mining Journal.

Work on the mighty telescope for the French Exposition of 1900, which was to enable us to see the man in the moon, has been suspended, after considerable progress had been made in the construction of it, especially in the optic portion. The great lenses are already cast, but the whole affair is now abandoned for want of money. The principal man of funds in the enterprise was the late Baron Reinach, of Panama.—New York Sun.

### BAD BLOOD CURED.

Gentlemen,—I have used your Burdock Blood Bitters for bad blood and find it, without exception, the best purifying tonic in use. A short time ago two very large and painful boils came on the back of my neck, but B. B. B. completely drove them away.

Samuel Blain, Toronto Junction.

### C. C. Richards and Co.

Gents, I sprained my leg so badly that I had to be driven home in a carriage. I immediately applied Minard's Liniment freely, and in 48 hours could use my leg again as well as ever.

Joshua Wynaught.

Bridgewater, N. S.

That string on your finger means "Bring home a bottle of Minard's Liniment."

Minard's Liniment is the Hair Restorer.
