Prof G. S. Eve

Direktor

Maritime Physics Bldg.

Dear Dr. Eve

I heartily concur in every
effort being made to keep the Street Cars
off ~~the~~ University Street.

Many times during my tenure
of office as Direktor I had to consider
this and the terrible effect the
continued operation of the Cars would
have on our Building cannot be
estimated.

I trust you will be successful
in presenting our case to the Tramways
Commission.

Faithfully yours

Howard T. Barnes
