The temptation for a telegraph company that traffics in news itself to take advantage of the news sent over its wires by special correspondents is very great, and newspapers have frequently been unable to account for the duplication of what has been supposed to be exclusive information. But this is only a secondary evil compared with the system under which the Canadian newspapers receive their United States and other foreign despatches. More than 90 per cent. of the foreign news that appears in the Canadian dailies comes through the hands of a great telegraph companies were it disposed to take advantage of itself and kindred companies were it disposed to take advantage of its opportunities. ritories under the management of the Department of Agriculture. Messrs. George and John Hickson & Co., Limited, Liverpool, write, under date Nov. 10, as follows:

"Enclosed herewith we have pleasure in handing you account sales for butter ex Labrador. We regret that your ship ment to us should have met with such a depressed market as ours has been for the last three months, which is chieftly owing to the very open weather we have experienced during that time. We are pleased to be able to report the quality of butter shipped by you very satisfactory, and with regular shipments we are certain we could build up a demand for your brands."

Similar letters have been received with satisfactory accounts from Messrs. Andrew Clements & Co., Limited, Manchester, and Messrs. Hodgson Bros., Liverpool. The depression in the butter market was made by the unusually large shipments from Denmark, Russia and the United States, at the time when very open and mild weather prevailed in Great Britain. For one week he shipments from these countries amounted to about 1000 tons of butter more than during the same week of last vear. The market is now slightly better and Canadian butter is in better demand.
