Says Cotton Workers' Action is interfering With War Work.

LONDON, Sept. 16—Greatly concerned over the cotton strike, Premark Lloyd George tonight from his sickbed issued an appeal to the strikers to return to work and leave the decision in the mathematical properties. To learn that arsenic was not used will no doubt come as a great surprise to most people in this district. From the second examination by the analyst it has been brought to light that paris green was found in the stomach. The first report that arsenic had been found is accounted for by the fact that a certain quantity of arsenic is used in the manufacture of paris green. It is said that the detective in investigating the case came into possession of a glass which had been washed, but still contained dregs of paris green, or at least, something of a green color.

As to the cause which led Miss Edwards to end her life, it is probable

George tonight from his sickbed issued an appeal to the strikers to return to work and leave the decision in the matters under dispute to the Government, after an inquiry by a special tribunal, to be appointed immediately.

The premier bases his appeal on the fact that the strike will seriously interfere with the production of war materials.

The spinners in the Yorkshire and Lancashire cotton mills quit work Saturday on the question of the abolition of the Rota system. The Amalgamated Association of Cotton Spinners has a membership of 20,000, but indirectly the strike will affect 300,000 operatives.

Take to the cause which led Miss Edwards to end her life, it is probable that the provincial officer's report will show that the girl was most despondent over the adverse turn her love affairs have the strike and taken.

The young man who had kept company with her for a number of years has made a statement to the authorities which it is expected will throw much light on the matter.
