DULNESS OF TRADING GOVERNS MINING MARKET

Price Fluctuations Are Generally Constricted, But Undertone is Fairly Satisfactory.

World Office,

Saturday Evening, Feb. 19. With speculative sentiment of a decidedly apathetic character, the Coball mining stocks have drifted into a period of almost semi-stagnation, where movements either way have been curtailed by the very lack of outside participation in transactions. There has been nothing in connection with the various listed issues of late to attract any special trading on the part of public security holders. The exchanges have generally been given over wholly to the operations of floor traders and such market followers as have been seized with the idea that prices could go very little lower and that there were good opportunities offered by the pre-vailing low range of quotations. With this the dominant feature of to-day's trading it could not be held at all surprising that price movements have been disappointing from their very constric-tion, while it has been felt in most quarters that there was considerable ound for satisfaction in that the securities held their own to such an ex-

It has been generally the case when stock trading has been conducted in a half-hearted way and transactions have been of but slightly more than nominal been of but slightly hole than a dropped quantity, that quotations have dropped slowly, but steadily, under the liquidation which seems bound to make itself tion which seems bound to make itself Big Six Black Mines Con., Ltd.,.... felt in a market of this calibre. It cannot be said, however, that to date this trend has been observable in connection with the various Cobalt leaves lest trend has been observable in connection with the various Cobalt issues listed on the local imining exchanges. True, Cobalt Lake there have been times during the last Conlagas few days when an evident desire to refew days when an evident desire to react has been more or less apparent, but the absorbing power of the markets has been at all times sufficient to take care of securities on offer with very little difficulty, and in this way the shares dealt in have maintained a steadiness of attitude which has held in check what might have been material losses, had realizing been forced to any extent.

It is evident from the list of transactions from day to day that attempts have been made to inculcate a more buoyant tone into such of the cheaper issues as have been more or less pro-

issues as have been more or less pro- Rochester minent of late. In this connection it Silver Leaf necessary to mention the case Silver Bar .. of Cobalt Central, which was seized up-on the other day and bid up a couple Timiskaming of points in a short interval, only to lose most of this gain later on, when operators in the stock availed themwhat of a favorite on the New York Chamber curb market, but the recent actions of 500 at 314. the shares on the exchanges and the Cobalt Lake—50) at 17%, 500 at 17%, 500 at 17%, 500 at 100 at 10

involved. The statement of President McGibbon of the La Rose Company toward the middle of the week, that negotiations were still in the "incubator stage," while it does not go very far. has been seized upon by some local Little Nip parties interested to bull the stock, 29, 100 at 29 hence the rumors which have been forthcoming that the big holders of several of the issues, which it is understood would be included in any amalgamation which might be formulated up their commitments, in the evident 300 at 25%. idea that there is a good possibility of such a merger going thru at no distant 1934. 500 at

The outlook for the immediate future in connection with the mining securities promises to be more or less irregular. It is believed in many quarters that many of the Cobalt stocks possess great intrinsic merit at prevailing quotations, and should any material speculative call be forthcoming, advances at 500 at 574, 500 at 564, 500 at 574, 5 kind of a way. The markets are pretty hare of floating stock, and this is the best argument in favor of higher prices that can be advanced.
