A NEW YORK STREET FRAUD
Having in charity dropped a nickel in the hat of a "one-armed" beggar who sat in a doorway in Harlem this week, Policeman Cavanaugh noticed an unusual bulging of the man's coat under the empty sleeve and became suspicious. He determined to investigate. The beggar, who subsequently in court gave the name of Edward Cook, took to his heels.

The chase led to a subway station, and just as the policeman was about to seize the fugitive the man's right arm shot out from under his coat, where it had been strapped, and struck him a heavy blow in the face. The beggar was then arrested and locked up.

In court Cook admitted that he had been faking as a one-armed man, but declared he was a waiter out of a job, and could not find one.

Dr. J. D. Maher's Prizes Drawn
This Morning—Numbers 5,383 and 9,023 Win

Mrs. Placide Bourke, of Milford, appears to be the winner of Dr. J. D. Maher's prize of \$100 in gold or a return trip to Demerara, and Miss Agnes Owens of Gilbert's Lane, since married, wins the return trip to New York.

The scratchmen were M. E. Agar, J. M. Robinson and R. B. Smith. They drew twelve numbers for each prize, so that for any reason any were void or were not produced, the next in order would be the winner without further drawing.

Mrs. Bourke's number was 5,383, and that of Miss Owens 9,023. The twelve numbers drawn for each prize were as follows:

The latest announcement is that the German ministry of war has ordered a new military transport ship to be ready next May.

The Jesuit Law
The federal council has rendered a decision upon the interpretation of the still unratified article of the imperial law for the suppression of the Jesuit order in the German Empire.

The unratified clause forbids the members of the order to exercise the functions of their order in Germany. As the prohibition was interpreted differently in various German states, Bavaria requested the federal council to give an authoritative decision.

This was asked for by the Bavarian government, which had requested the federal council to give an authoritative decision.

The question resolved itself in the minds of many Germans into a question of the Jesuit order and the German chancellor.

The authoritative decision just handed down by the federal council is a victory for Dr. von Bethmann-Hollweg, who undoubtedly has the majority in the empire behind him.

The members of the order of Jesuits are forbidden to exercise their religious ministrations towards those outside the order and the giving of instruction. This latter prohibition is a great blow to the friends of the order, because in many cases it is believed that the Jesuits may deliver lectures or read papers publicly on secular subjects.

The "Germania," the principal organ of the Centre party, declares that not only in all civilized but in semi-civilized countries a feeling of pity will be entertained for an empire in which in present circumstances such a decision is possible, and it anticipates that the criticism of Catholic people will send anything but pleasantly in the ears of the federal council. A cry of indignation will, it says, be raised by the Catholic section of the population which will not be allayed until the whole Jesuit law is repealed.

What influence the definition will have on the attitude of the centre party in the Reichstag remains to be seen. It is already hinted that the chancellor will be interpellated on the subject and in a form which will amount to a vote of lack of confidence. It is also more probable that the whole socialist party will support the centre in such action on the principle that all exceptional laws are unjustifiable and objectionable.

LARGE FUND SUBSCRIBED

Decision as to Jesuit Law — Attempt Against Life of Crown Prince—Critical Letter of Kaiser on Education Comes to Light

(Times Special Correspondence)
Berlin, Dec. 30.—It is confidently believed in the quarters most closely interested, that the production of a German aerial navy bill is certain, and that the bill will come before the Reichstag in the spring. It is said on reliable authority that the recommendations of the German war office and admiralty include the creation of a fleet of Zeppelin airships, of about 20,000 cubic feet capacity, twenty at the outset, and capable of travelling at fifty-one miles an hour and remaining aloft for four days and four nights without a landing. They are also to be capable of carrying and discharging one ton of explosives.

So great is the enthusiasm in Germany for the national fund, which started this year, has already reached a total of \$1,500,000, showing that previous patriotic efforts, including the great Zeppelin fund of four years ago, have not exhausted the German people. Two separate gifts indicate the German of authority on the Eastern works and the Essen city council each gave \$25,000. But the gifts range from half a mark to \$100,000.

Germany is secretly training air pilots in large numbers. At the present moment Great Britain has no more than forty-five effective aeroplanes, and at the lowest estimate Germany has 120, besides possessing some 100 more of older types. Germany aimed at the beginning of this year to possess 400 military aeroplane pilots, and the writer is advised from trustworthy sources that she possesses nearly this number already. It must not be assumed that they are all of the first class, but a large number of them are experienced cross-country fliers and many have experience in the use of bomb-dropping instruments and in the employment of guns on aircraft. Many of the aeroplanes carry wireless apparatus.

At the present moment Great Britain has no more than forty-five effective aeroplanes, and at the lowest estimate Germany has 120, besides possessing some 100 more of older types. Germany aimed at the beginning of this year to possess 400 military aeroplane pilots, and the writer is advised from trustworthy sources that she possesses nearly this number already. It must not be assumed that they are all of the first class, but a large number of them are experienced cross-country fliers and many have experience in the use of bomb-dropping instruments and in the employment of guns on aircraft. Many of the aeroplanes carry wireless apparatus.

Germany is secretly training air pilots in large numbers.
