Movement for the Reconciliation of the Armenians With Powers at the Porte.

Washington, D. C., May 22.—Secretary Olney has received a letter from Miss Clara Barton, in which, referring to the rumors that she was prohibited from distributing relief in Asia Minor, except under direction and control of the Turkish authorities and from lists of persons furnished by the Turkish officials, she emphatically denies that any members or officials of the Turkish government have ever tried to direct or control her distributions. She adds:

"The Turkish government is thoroughly convinced that there is no political significance attached to our visit; that we have no sectarian interests to serve and certainly no radical prejudices. There have been no requests which they hvae not granted, no suggestions which they have not promptly acted on. Our every desire has received respectful at-tention, careful consideration and cor-

dial concession "The primal work in consideration of both parties has been and is the distribution of the farming tools and seeds, so the generous gifts of our great hearted and open-handed people will mean a permanent rather than a temporary benefit. The latest evidence of kindly interest in our work shown at both palace and in porte has just been brought to us by Mr. Cargiulo, first dra-

disastrous war. The twenty youngsters anxious to plant their fields, but are afraid to leave their homes for that treasury benches all night long in forgery. FASTENED IN FERRIS WHEEL. A Number of Novelty Seekers in London fully rewarded.

London, May 22.-It is a curious co incidence that while the members of the house of commons were practically confined in the house last night, a nun ber of persons, men, women and children, were undergoing a somewhat similar experience at Earlscourt. A quiet party had entered the great wheel there known as the "Gigantic wheel recreation tower." This structure is in imitation of the Ferris wheel of the Chicago world's fair; only larger, the highest point of the London wheel being 300

feet from the ground, while the top of the Ferris wheel is only 264 feet high. Shortly before 8:15 p. m. yesterday the wheel started with quite a number of passengers on board. Everything went merrily until 8:20, when the structure stopped revolving. At first little or no attention was was paid to the matter, but as time passed and the wheel would not budge, those able to do so left the cars, and steps were taken to rescue those imprisoned higher up. Ladders were procured and later fire escapes were used. In spite of all these efforts many persons were com- tants pelied to remain aloft. About midnight they got hungry, and every means were devised to feed them and make them comfortable for the night. Eventually they went to sleep, but awoke this morning very hungry. By means of ropes, cans of coffee and baskets bread and other provisions were hauled up to them, and the work of trying to revolve the wheel was resumed. Not until noon to-day were the prisoners finally released, amid much cheering from the crowds who had assembled to witness the rescue.

The London stock exchange will be Whitsuntide holidays. Monday bank holiday.

NO 26. FRIGHTFUL EXPERIENCE. Explosion on Board a Russian Emi-

grant Ship in Mid-ocean.

Japanese papers which arrived on the Empress of India contain a story from Australia, regarding the explosion on board a Russian emigrant ship. 'The story follows: The captain of a grain steamer from Liverpool to Adelaide describes a ghastly experience on the voyage. He put in at Prince Edward's Island for fresh water, and found the inhabitants terrified over the continual washing ashore of of remnants of human bodies, arms, legs, trunks, heads, some of wemen, some of men, and all fearfully bloated and distended as if by gas. On putting to see again the captain discovered the fearful secret. When two days out he saw what seemed to be a ship, on which a series of explosions were taking place. The vessel seemed at red heat. For ten minutes or so the flames would hover along the bullwarks, then would come s dull report. Like a spurt from a vol-cano the blaze would then leap skyward, only again to subside and lick along the rails and up the masts. "in each flashing blaze that followed the next week, will be one of the most in- explosions aboard the derelict we could see hurled aloft strange shapes and has ever taken place. An effort will fragments unlike anything I had ever seen stowed in a vessel's hold or cargrand sovereign, and put James L. go.
