

Dairying Association.

Upper Kintore Society Holds a Successful Meeting.

(Special to Telegraph.)

Kintore, Jan. 18—Upper Kintore Dairying Association held their monthly meeting in the school house, President A. Phelip in the chair. As we have entered on our seventh year of the association it was arranged to have a kind of a sociable. There was a large attendance of the members and their wives along with the young people, who were welcome. At eight o'clock the president called the meeting to order, and after the minutes of the last meeting were read and approved the subject was introduced by J. W. Corey, "Intensive or Extensive Farming as Applied to Local Conditions." He contended that market or truck gardening or growing in hot-beds was impracticable in this locality owing to our being so far removed from the city markets. Neither was the growing of small fruit profitable because of the uncertainty of our climate. That probably the only system of intensive farming practicable here was the small farmer of say 25 acres who sought by superior cultivation and scientific manuring to produce the highest possible amount per acre. He contended that after allowing for the necessary expense for keeping his working team, that even allowing the high average of 80 bushels of grain per acre for the ploughed land and two tons of hay per acre on the grass land, only some \$250 worth would be produced. He then took up extensive farming: claimed that extensive farming as understood in the western country was impossible here; that, in fact, extensive farming, as practicable here, must be the cultivation of a hundred or one hundred and twenty-five acre farm. He said that there was the same expense for keeping a team of horses; that a pair of horses would easily handle one hundred acres under the ordinary system of cultivation, and that by proper rotation and pasturing and using such manures as were produced on the farm an average production of 40 bushels of grain and one ton of hay per acre could be obtained, which at current prices would be some \$600 value produced on the hundred acres, as compared with \$250 on the small farm; and he claimed the extra expense of harvesting on the larger farm would be more than offset by the expense of fertilizing the smaller one.

Believing thus he urged his fellow farmers to increase their acres, yet at the same time to make use of the teaching of science and of the results attained by the experiments of others, as far as practical, charging them to remember that he who makes two blades of grass grow where but one grew before, is a benefactor of the race.

The address was listened to with great interest by all present and brought out a good discussion from the members. The voice of the meeting was in favor of extensive farming. Subject for next meeting, "Poultry Raising."

The sociable part was then entered into with songs, recitations, readings and short addresses. After a very enjoyable time by all, tea was brought in and the baskets uncovered and every-

body did justice to their contents. After tea a few short addresses were given by members; then all joined in singing "Auld Lang Syne," when all departed for their homes, well pleased with themselves and every one else, at the wee short hours ayont the twelve.

Waterville Warblings.

MR. EDITOR,—In looking over the columns of the ADVERTISER, I fail to find anything connected with Waterville, for what reason I don't know. If you have any doubts about there being such a place, you had better take a voyage of discovery, directing your course up the Little Presque Isle river. The country at first may not present a very attractive appearance, but after a course of say about four miles you will reach a strip of country beautiful for scenery, and of a highly agricultural aspect, the centre of which is Waterville.

Having arrived in the village, the most notable feature will be the mills, saw and grist, owned by J. B. Getchell. Both are in operation, and a large amount of lumber is being yarded, speaking favorably for the spring's work.

The emigration to the Klondike during the past has not drawn any of our young men away. They seem content to stick to the old land and win their gold by "the sweat of their brow" rather than by the chills of an arctic winter.

The farmers of this place are talking of establishing a cheese and butter factory at an early date.

Waterville L. O. L. has just closed a very prosperous year under the management of A. E. Plummer, W. M., who has been re-elected for the ensuing year. Although it has been but a year in existence, it now boasts of forty-five members, and prospects for further growth look favorable.

The school at Waterville is as usual quite large, and is under the management of Leon H. Jewett.

We are glad our Hartland friends are buoyant in spirit in regard to the bridge, which is so necessary. We hope it will materialize, as it would be of much advantage to farmers exporting their produce from this section.

We hear no more from the Woodstock and Centreville railway. Don't know as we ever will. The dynamite, pick and shovel are laid aside and the snows of a New Brunswick winter has cast a total eclipse over the remains.

MONTE CRISTO.

Legal Blanks.

Executions, subpoenas, capaises summonses, etc., on good paper for 40 cents per 100; tax bills, 25 cents per 100; bills-of-sale, deeds, mortgages, 75 cents per quire.—tf
