is regarded as a necessity. Montreal has a splendid building. Bangor and Portland, Me., are other familiar examples. Other things being equal, a business house would prefer to engage the services of young men connected with the Y. M. C. A. The influence of with the Y. M. C. A. The influence of the association is for the good of the boys and young men of the commun-ity. In this city the directors have al-ways been hampered because of a lack of funds and of a sultable building. We are to have a new library building, and a new home for the Y. M. C. A. would be a fitting complement to it, and an

rnament to the city.

In connection with the railway work of the Y. M. C. A. it is worth noting that the directors of the Pennsylvania railroad have appropriated \$35,000 for a home for the association organized among its employes.

BRANCHING OUT.

the government of that country. A question now engaging the attention of the naval authorities is that of coalof the naval authorities is that of coaling stations. With a steadily growing navy, and with an extension of United States commercial interests, bringing the country into closer touch with the other great powers and the affairs of the world at large, it is felt that more coaling stations are absolutely necessary. At present attention is chiefly confined to parts already in possession of the United States, although a depothan here established at Tokohama. has been established at Yokohama, Japan, and one on the coast of Mexico. Work is progressing on naval stations at Honolulu. Several coaling depots have been established in the Philippines, and others are being selected. The question of stations in Porto Rico and Cuba is under consideration. On the Atlantic coast of the United States, arrangements have been made, and in establishment of coal depots at Frenchman's Bay, Me., considered an excellent strategical site; Portsmouth, N. H.; Boston, Narragansett Bay, R. I., another place selected on account of its strategical advantages; New London, Conn.; the New York Navy Yard, League Island, Pa.; Washington, D. C.; Norfolk, Va.; Port Royal, S. C.; Key West and Dry Tortugas, Fla.; both regarded as important strate-gically; Pensacola, Fia.; Algiers, La. On the Pacific coast stations are or will be established at Dutch Harbor, Alashe established at Dutch Haroot, Alas-ka, Sitka, Alaska; Bremerton, Washl; Mare Island, Cal.; Mission Rock, San Francisco Bay, and San Diego, Cal. Efforts are also being made to secure coaling stations in foreign countries, but on this point the naval authorities are very reticent.

A PHILOSOPHIC HISTORIAN.

States navy contained the attack upon Admiral Schley, and who was chiefly responsible for the long and expensive enquiry that has been held, takes matters very philosophically. He says:

"I am awalting the decision of the court before putting out the revised edition of the history. If the court exonerates Admiral Schley and clears him of all discredit I will at once cut out that portion of the third volume which is detrimental to him."

which is detrimental to him."

His history of the navy has certainly been widely advertised, but the manner of the advertisement will probably not increase the popularity of the book. If he has been grossly inaccurate in dealing with Admiral Schley there will, perhaps, be some doubt concerning its accuracy in general. Curiously enough, Mr. Maclay is a cierk in the Brooklyn navy yard, thus holding a government position.

An anarchist meeting to "commemorate the legal murder of the Chicago anarchists," which had been called for last night in London, was prohibited by the police.

ing the matter in charge have carefully considered the matter and decided to launch a movement for a new building on a site to be determined later. The movement plans for the raising of 380,000 for the site and complete equipment, and it is definitely stated in the subscription pledges that no operations are to be begun or ground purchased until \$80,000 is secured. This will ensure the erection of such a building as will be a credit to the city of St. John, and one which will enable the association to be an aggressive agency for good in the community.

One gentieman has already pledged a subscription of \$15,000 on condition that several other public spirited men contribute substantial amounts. While no general carnass has been started, something over \$15,000 is assured. It is now proposed to make a general carnass has been started, something over \$15,000 is already subscribed, and considerable more is assured. It is now proposed to make a general carnass has been started, something over \$15,000 is already subscribed, and considerable more is assured. It is now proposed to make a general carnass has been started, something over \$15,000 is already subscribed, and considerable more is assured in the proposed to the comment of the city in the proposed to the interest of this movement is far before the proposed to OTTAWA.

OTTAWA, Nov. 12.—A deputation of shipping men from Montreal saw the government today on the subject of improving navigation. Messrs. Reford, Harlin, Allan and Torrance addressed the ministers. They presented a memorial covering their requests, suggesting the advisability of the government requesting from the home authorities the services of an experienced hydrographic engineer to report on the St. Lawrence route and so remove the prejudice of insurance companies and others on the other side against the route, this engineer also to make a report of the improvements necessary. It also asked a statement from the dominion government of the improvement work to be done during the next two seasons, and urged that St. John, Hallfax and Sydney be made winter ports of Canada instead of American ports, to which end it was suggested that the Intercolonial railway be shortsmed between River du Loup and Moncton.

Incidentality the memorial urged the

LI HUNG CHANG.

To cure a Headache in ten minute use KUMFORT Headache Powders. HALIFAX AND CARNEGIE.

(Halifax Recorder.) The return of Alderman Geldert from England naturally suggests the subject of the public library and Mr. Carnegie's offer to give ten times as much as the city could raise towards that object. It has been already resolved that the city will provide \$5000 per annum, and there are hopes that the provincial government will supplement that with another \$100, so that Mr. Carnegie, under this provision, would present the city with \$60,000 towards the erection of the building. This is a handsome offer, and one which our citizens should grasp with avidity. Not only so, but many are of the opinion that the sum which Halifax could and should raise ought to reach at least \$\$,500, and thus ensure a sum from Mr. Carnegie of \$85,000. This amount would allow the city to realise the construction of such a building as would be not only a credit and ornament to the place, but add one more fewel in Mr. Carnegie's crown of public spirited generosity.
