The accident, which occurred about 4:30 o'clock, is said to have been caused by Patterson losing his balance, as he was repairing the edge of the roof. An employee of George S. Fisher, who was working next to him said that he saw Patterson reach over, as though in the act of catching a fallen tool, and at almost the same instant fall from the staging. "I never expected to see him again alive," the man added.

Mr. Hazen's Workmen Were Busily Engaged Repairing Road for First Time This Year.

Those who attended the Loch Lomond fair yesterday were much interested in watching three teams and several men busily repairing the road. The particular part was a stretch beyond the bridge next the old Ben Lomond House.

Several of the residents of the district expressed as much surprise as the people from the city, they said that was the first repair work that had been done on the Loch Lomond road this year. They added that the repairs were being done in just that place at that time so that the public would be able to see and appreciate the efforts of the Hazen government.

The largest exhibitor of live stock at the annual fair of the Simonds and Loch Lomond Agricultural Society on Tuesday was James Desmond. He has held this position for a great many years. Besides thoroughbred horses, he has shown horses, sheep and swine. He uses the up-to-date methods for testing cows for milk production. He only feeds for profit and is weeding out all unprofitable cows from his herd. The pedigree of these cows show that they come from the important stock of the oldest stock breeders in New Brunswick, J. M. & Lawrence Donovan, Coldbrook, St. John county.

Minister of Public Works Visited Campbellton on Way Down and Went Over International to St. Leonards—Believes City Got Best of Exchange in West Side Deal With C.P.R.

Wednesday, Oct. 12. Hon. William Pugsley, minister of public works, arrived in the city last evening in the private car Campbellton, of the International railway, which was attached to the Ocean Limited. He and Mrs. Pugsley were the guests of Thomas Malcolm.

On route to St. John the minister took occasion to go over the new International Railway from Campbellton to St. Leonards, where he inspected the International bridge between St. Leonards in Madawaska county and Van Buren, in Maine, which is now under construction by his department. He found the work progressing satisfactorily. The piers are being constructed and in all probability will be ready for the superstructure about the first of the year.

Speaking of St. Leonards he said he was much struck with the opportunities presented by this thriving town. At the present time trains from the Canadian Pacific and the International are serving it and very soon those of the Transcontinental will pass through it. When the International bridge is completed there will be easy access to the Bangor & Aroostook Railway at Van Buren. Even now the small ferry operating between these two places has much traffic.

The International railway between St. Leonards and Campbellton, a distance of 112 miles, is all completed save a little ballasting and the minister said he was surprised to find the new road in such first class condition. There are some sections and section houses to be completed but these are being rushed forward as rapidly as possible. Even now the traffic is considerable, the supplies for the lumber camps and mills furnishing plenty of freight. The country through which the new road passes possesses wonderful resources and these are being rapidly taken advantage of by the enterprising lumbermen and mill owners.

When asked about the situation at Campbellton he said that the question of assistance to the stricken town had been taken up in council by the dominion government but as all the members were not present further consideration was postponed until the end of this or early next week when he returns to Ottawa. He remarked that many of the people were still living in tents and that there was much suffering and hardship, but in spite of their deplorable condition he could not help being impressed by the remarkable enterprise shown.

Mr. Hays Here Oct. 20. Touching upon matters more of interest to St. John, the minister said C.M. Hays, of the Grand Trunk Pacific, would be in St. John on the morning of the 20th and while he would probably have to go to Ottawa in the meantime he would return and be in St. John during Mr. Hays' visit. Mr. Hays would leave for Montreal by day after the banquet to be given him on the 21st. St. John was for the purpose of inspecting the new G. T. P. terminals at the head of Courtenay Bay as well as being generally over the ground. The minister said although the date of the opening of parliament had not been decided upon, it was thought that it would be either November 10 or 17.

City Getting Best of Bargain. He expressed his satisfaction that the common council had decided to transfer the lots on the west side to the C.P.R. in exchange for the strip along the harbor and said that in his opinion the city was getting decidedly the best of the exchange. As soon as the transfer was signed the C.P.R. would begin to carry out its plans to construct a yard that would accommodate 5,000 cars. Dr. Pugsley expects to remain in St. John for two or three days, returning to Ottawa the last of the week.
