

# Lighting Installations

**May we be of service to you?**

We have men who are gladly placed at your disposal if you would care to have us make suggestions as to how many lamps to use and just where to place them to get the best results.

We are doing this sort of work right along and our experience might very well be useful to you and certainly the service will be gladly and freely rendered, without obligation.

In passing, let us remark that Hydro Shop's lamp stock is unusually good and complete at this time. Why not lay in a supply **NOW** and have them ready against the shorter days to come.

*We are at the other end of your telephone wire*

**Toronto Hydro-Electric System**
