

II. FEBRUARY bath XXVIII Days. 1799.

See first how curiously he scans the sedge,
 Then warily proceeds along the edge :
 His piece is cock'd, and in position right,
 To meet his shoulder readily and light.
 But yet, more cautiously he treads beside,
 The well known plash, where most he thinks to hide
 The capped bird—and from the rusby stream,
 Frighten'd she rises, with a piercing scream.
