

Fever, in fact, all animal and vegetable fevers, are prevented and cured by RADWAY'S PILLS, assisted, when required, by the READY RELIEF.

TREATMENT.

As a prevention, when either of these maladies prevail, take one Pill per day ; this will regulate the liver and supply any deficiency of the healthy condition of the gastric juice, the natural solvent of the system, and secure healthy digestion. Ten to twenty drops of Ready Relief in water, as a drink, will secure invigoration and strength where there is weakness, lassitude, and languor, and neutralize the poisonous acids generated from the gases of indigested food, irritant and morbid humors of the stomach, etc. ; and if seized with any form of fevers, take the pills in large doses, four to six every six hours ; a few doses will ensure a cure. I have cured the worst forms of Yellow, Typhoid, Marsh, Ship, and Isthmus Fevers in the West Indies and South America, and my treatment with the Ready Relief and Pills has met with the same success in the East Indies. These fevers are all of one family, and will more readily yield in their milder forms as they exist in temperate climates, than in their more fatal types of the tropics.

ONE PILL,

taken when symptoms of dizziness, fullness, or pain in the head, nausea at stomach, indigestion, costiveness, pain after eating, sleeplessness, bad dreams, etc., etc., appears, will soon cure this difficulty. Radway's Pills are unlike all other pills ; each Pill contains eight grains of the active curative principles of extracts of the rarest products of the vegetable kingdom—of ingredients some of them never before used as medicine, and to be found only in these Pills.

In cases of colic, severe inflammation, or paralysis of the bowels, and a speedy discharge of their contents required, grind six of the Pills to a powder, and take in some preserves or water. In half an hour the Pills, given in this way, will generally operate. The dose can be repeated, if necessary, in two hours. We have known the Pills, given in this form, to open the bowels WHEN CROTON OIL, *Elaterium*, *Podophyllum*, MANDRAKE have failed. It is seldom that a second dose will be required in these cases of *Intestinal Obstructions*.

It will greatly assist the Pills, in effecting a cure, by giving the patient a bowl of hot oatmeal gruel six hours after taking the Pills, or in the morning previous to their operation. In sudden Colds, Influenzas, etc., this treatment is a sure cure.

As an evidence of the high estimation in which Dr. Radway's Pills are held by the Medical Faculty of Europe, we present a letter from the Professors of the Medical College of Breslau, Prussia, embodying the results of an analysis of RADWAY'S REGULATING PILLS, instituted for the satisfaction of the Prussian Government and people

"It appears that the great popularity of the Pills throughout Germany, as an aperient, antibilious, and alterative medicine, had provoked the malice of the apothecaries, who caused a report to be circulated that the ingredients were poisonous. Therefore a scientific inquisition into their nature and properties was ordered, the issue of which was a most triumphant vindication of the sanitary value of the Pills.

"The Faculty of the College say in their report that, *after a careful and minute examination*, they have the honor to state that 'the Pills are not only free from every substance injurious to health, but are composed solely of substances and elements promotive of digestion, and certain, at the same time, to act favorably upon the nervous system, etc., etc. They state further, that the injurious rumors set afloat by the Prussian apothecaries originated in a mean spirit of trade jealousy, excited by the great celebrity attained by the Pills within a very brief period.

"Signed in behalf of the College,

"DR. PHIL. THEOBALD WERNER,

"Director of the Polytechnic Bureau.

"DR. HEISE, First Assistant."
