

Are You Prepared For Harvest Time

Why risk your entire season's profits on a sudden turn of the weather? Lack of sufficient power may spell ruin.

Plenty of reserve power means a quick, full harvest. It's the necessary aid to bigger, better crops and larger profits.

So when harvest time comes, be sure *you* have plenty of power.

Don't depend on animal power. Play safe. Horses and men are profit wasters. Use the "ever ready" mechanical power of a Hart-Parr Tractor. Then you'll understand why

Harvest Days Are Hart-Parr Oil Tractor Days

One Hart-Parr Tractor is more efficient than 15 to 30 horses and several men. Hauls 3 to 5 big binders with steady, even pull. Never tires. A blazing sun can't sap its strength or endurance. Exerts full power every minute you work it.

Depending on size, it will harvest 60 to 100 acres a day and save \$8 to \$10 daily over horses. Many a Hart-Parr owner pulls a 6-bottom gang plow and 7-ft. harvester behind his tractor and easily harvests and plows 20 acres a day. This kills weeds and insures a better crop next year. Here's Hart-Parr performance. Read this letter—ponder over it.

Watson, Sask., Can., Jan., 1, 1912.

Hart-Parr Co., Charles City, Ia.

Dear Sirs:—

When threshing began, we hired a steam engine to do our threshing, so that we might plow with our Hart-Parr Oil Tractor. The steamer did not prove satisfactory, so we ran the separator with our Hart-Parr Tractor and threshed about 15,000 bushels. Threshing was slow on account of bad weather.

After we finished threshing, the ground froze, and of course, we did not get much plowing done. We set our tractor aside; meanwhile it snowed considerably and got very cold, so that some steam threshing outfits got disabled by the cold weather and others quit altogether, with still quite a lot of threshing to be done in the neighborhood. Some of our neighbors asked us to thresh their grain. They offered us 4c. to 6c. a bushel, they to furnish everything but power.

Altho it was hard getting around in the snow and very cold mornings, of course we threshed. We got our Hart-Parr Tractor started any cold day. It was the only one that could pull a separator behind it in the snow.

It has got to be very cold when our Hart-Parr Tractor will not start with the first turn of the fly wheel. Very truly yours, F. J. Weber.

It's the easy-to-operate *One Man Outfit*. Uses cheapest kerosene for fuel. More reliable than horses. Costs nothing for upkeep when idle. Three sizes: 30, 40 and 60 B. H. P.

Write for our 1912 catalog. It tells all about this general purpose farm tractor.
