

"EXPERT EVIDENCE" DR. SCOTT'S STOCK COMPOUND

Finds favor with the largest exporters and importers and undoubtedly the best judges in Canada.

READ THIS:

There is no Stock Food or Blood Purifier on the market to-day that gives the universal satisfaction and does all that its proprietor claims for it as Dr. Scott's Dietetic Stock Compound. Knowing the ingredients that it is composed of, I strongly advised the Dalgetty Bros., the largest importers and exporters in Canada, to give Dr. Scott's Compound a trial with their horses on board ship, and to our utmost delight the consignments have landed with their legs in natural condition, free from the swelling and staking that we were continually troubled with, their coats and skin in glossy condition, appetite good, and, in fact, the horses were in shape to show to customers and sell right off the boat, and continued to thrive and gain flesh.

Dietetic Stock Compound strengthens the digestive organs and acts mildly on the excretory organs; in fact, tones up the whole system, enabling the animal to get full benefit of all the nourishment contained in the food.

Since using this compound our stables at home and abroad have never been without it.

For debilitated and unthrifty animals we consider it has no equal as a flesh and health producer, and cheerfully recommend its use. Signed,

E. A. BLACKWELL,

Veterinary Surgeon for Dalgetty Bros., London, Ont.; Dundee, Scotland.
Put up in 25-lb. Pails at \$2.50, 9-lb. Packages for \$1.00, and 4-lb. Packages at 50c.
MANUFACTURED BY DR. SCOTT & CO., LONDON, ONT.

Address: Columbus, Ontario.

LAFAYETTE STOCK FARM

J. Crouch & Son, the Great Importers, of Lafayette, Indiana,

and the largest importers in the world of

GERMAN COACH, PERCHERON and BELGIAN STALLIONS,

have just received at their new sale barns, Bernard House, London, another car of Percheron, Belgian and German Coach stallions. All are imported from France, Belgium and Germany, and are the largest prizewinners of 1904. We exhibited 100 head at the St. Louis World's Fair, and we have won more prizes in 1904 than all others combined. We guarantee every horse to be satisfactory, sure breeders, and back them up by a responsible guarantee. We sell nothing but good sound serviceable horses that will do our customers good.

QUESTIONS AND ANSWERS. Veterinary.

LAME HORSE.

Four-year-old Clydesdale goes lame in left hind leg after he stands in the stable for a day or so. After driving about a mile, the lameness disappears.

A. E. Y.

Ans.—The symptoms indicate spavin lameness. Get your veterinarian to fire and blister him. The sooner this is done the better, if you want to work him in the spring. In some cases blistering will effect a cure, but it usually requires firing.

V.

RINGWORM.

Heifer has a scab or scruff in spots. Around the tail the hair is off, and the skin has a whitish appearance.

W. T. L.

Ans.—This is ringworm, and as it is very contagious, the heifer should be isolated. Soften the scales with sweet oil, remove them, and then dress the spots daily with tincture of iodine as long as necessary. The disease is due to a parasite, which is easily carried from one animal to another, hence great care is required to prevent it attacking others.

V.

PREMATURE ACTIVITY OF LACTEAL APPARATUS—ITCHY LEGS.

The lacteal gland of pregnant draft mare has become active and milk escapes. She bites her legs from hocks to body and makes them bleed. The legs are not swollen.

W. T. D.

Ans.—The premature activity of the gland is doubtless due to some irritation of the generative organs. It is often noticed when the fetus dies in the uterus, and in other cases where the accident has not occurred. The foal of a mare in which this condition exists for any considerable time is usually, though not always, weak when born. Reduce her feed, give only dry food, as hay and a little oats; keep quiet and avoid excitement. Give one and a half drams solid extract of belladonna twice daily until milk ceases to flow. Dress the itchy legs three times daily, or oftener, if necessary, with a solution of corrosive sublimate, twenty grains to a pint of water.

V.

WORMS, ETC.

1. Two horses have worms.
2. Would the treatment for No. 1 be proper for pregnant mares?
3. What is good for horse's urine?
4. Would treatment for No. 3 be proper for pregnant mares?

E. H.

Ans.—1. Take three ounces each of sulphate of copper, tartar emetic and calomel; mix, and make into 24 powders. Give each horse a powder every night and morning for twelve doses, and in eight hours, give each a purgative of eight drams aloes and two drams ginger. 2. Give the powders, but omit the purgative. 3. It depends upon what is wrong with the urine. It is seldom treatment is required. If the urine becomes scanty and of too great consistence, give four drams nitrate of potash every night for three doses, but do not continue this treatment else you will weaken the kidneys from over stimulation. 4. Yes.

V.

MUD FEVER.

Horse's hind legs are badly stalked and he is stiff. His sheath and the floor of the abdomen are also swollen. His legs are cracked, and discharge a sticky substance.

A. S.

Ans.—This is a form of erythema called "mud fever." Feed bran only for twelve to sixteen hours, then purge with six to nine drams aloes, according to size, and two drams ginger. Follow up with one and a half ounces Fowler's solution of arsenic twice daily for ten days, cease giving for a week, and then repeat, etc. Poultice the raw places with linseed meal and a little powdered charcoal applied warm every eight hours for two days and nights; then dress three times daily with a lotion composed of one ounce each sulphate of zinc and acetate of lead, and four drams carbolic acid to a pint of water. If the parts become too dry and hard, alternate this dressing with oxide of zinc ointment. Do not wash the legs. Feed lightly on hay and bran, and give regular exercise when the roads are dry.

V.

To Loosen the Cough

AND BRING ABOUT A THOROUGH CURE OF COLDS, USE

DR. CHASE'S SYRUP OF LINSEED AND TURPENTINE.

It is sometimes dangerous to stop a cough.

The aim should be to loosen the cough, relieve the tightness and pain in the chest, and aid expectoration, so that the obstructing and irritating mass may be passed out of the air passages.

This is exactly what is accomplished by the use of Dr. Chase's Syrup of Linseed and Turpentine.

It is not a mere cough mixture, and not intended to stop the cough, but rather to cure the cold.

If you have tickling in the throat, pains and tightness in the chest, sensations of irritation, of oppression or suffocation, this great family medicine will afford almost instant relief, and thoroughly overcome the cold which gives rise to these symptoms.

Not only is Dr. Chase's Syrup of Linseed and Turpentine a positive cure for croup, bronchitis, whooping cough, asthma and severe chest colds, but is also a preventive of all diseases of the lungs.

It has time and again proven its right to a place in every home, and is the standby in thousands of families.

Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle, at all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous recipe-book author, are on every bottle.

WHY NOT IN CANADA? STEVENS' OINTMENT

Has had over half a century's success on the horses of England and other parts of the world. Where introduced has superseded all other remedies.
