

JUST ONE roof is required when it's Carey's, for the Carey roof lasts as long as the building stands. Send us your address. We want to tell you why

CAREY'S
Flexible Cement
ROOFING

affords the best protection for all farm buildings. The Carey roof is fire resisting, wind and water proof, and is unaffected by heat or cold. Because it is everlasting, requiring no patching, Carey's is by all odds the most economical roofing on the market. It is suitable for steep or flat surfaces; is easily and quickly laid on new buildings as well as over leaky shingle or metal roofs without removing same. Our patent lap covers and protects nailheads.

Write for free sample and beautiful booklet, which fully describes this wonderful roofing.

"TUBULAR--or "Back Breaker?"

When you see the waist low Tubular you can't be driven into buying a back-breaking, "bucket bowl" separator. Can and crank are just the right height on the Tubular. Here is the largest Dairy Tubular along side four "back breakers." The girl with her hand on the Tubular is 5 feet, 4 inches tall. This is an exact reproduction from a photograph. Which kind for you? Makers of "back breakers" try to get their cans low by setting the cranks low. High cans break your back backward—low cranks break it forward. Unless you are a double jointed giant, you'll find a high can is no joke. To show you how high these "back breaker" cans really are, when the machines are set high enough to turn easily, we raised these "back breakers" 'til their crank axles were level with the Tubular crank axle. "Back breaker" makers don't like this picture—it's too true. They try to squirm out of it. You wouldn't like turning cranks as low as "back breaker" makers put them.

The low can is only one of many advantages Dairy Tubulars have over all others. Dairy Tubular bowls are simple—"back breakers" are complicated. Tubulars are self-oiling—no oil holes to fill up. "Back breakers" are oil drippers and oil wasters. To learn a lot more about Tubulars, write today for catalog N-193

BELL'S
ENSILAGE
CUTTER

Cuts Quick, Clean and Even.

Bell's Exhaust Blower takes all the corn off the cob—breaks up the cob and smashes the stalk. Ensilage—cut with the Bell—gives horses and cattle an even feed, gives all an equal show at grain, stalk and leaf, packs evenly in the silo, and takes up about 1/4 less space of ensilage cut with the ordinary machine. We make all kinds and sizes. Write us your needs and we will tell you what machines and attachments will pay you best to put in.

B. BELL & SONS, Limited
ST. GEORGE, ONT.

WITH OUR
