

## Boog Spavin

Cure the lameness and  
horns—have the part looking just as it did  
before the blemish came.

**Fleming's Spavin Cure (Liquid)**  
is a special remedy for soft and semi-solid  
blemishes—Boog Spavin, Thoroughpin,  
Splint, Ours, Clapped Hoof, etc. It is neither  
a liniment nor a simple blister, but a remedy  
unlike any other—doesn't irritate and can't  
be limited. Easy to use, only a little re-  
quired, and your money back if it ever fails.

**Fleming's Vest-Pocket  
Veterinary Adviser**

describes and illustrates all kinds of blemishes,  
and gives you the information you  
ought to have before ordering or buying any  
kind of a remedy. Mailed free if you write.

**FLEMING BROS., Chemists,  
75 Church Street, Toronto, Ontario**

### OXFORD DOWN SHEEP AT FARNHAM FARM.

We have 50 yearling ewes, all bred to our im-  
ported ram, champion at Toronto Exhibition, 1906,  
which we will sell at especially reduced prices for  
the next thirty days, in lots to suit purchaser. Also  
a few yearling rams and ram lambs by imported  
sires. Terms reasonable.

**HENRY ARKELL & SON, ARKELL, ONTARIO.**  
Arkell, C. P. R. Guelph, G. T. R.

### Shropshires, Cotswolds

I am now offering a lot of large, well-  
covered rams. They weigh from 160 to  
200 lbs. each. Also shearing ewes, ram  
lambs and ewe lambs, of both breeds,  
fitted for showing.

**JOHN MILLER, BROUGHAM, ONT.**  
Claremont station, C. P. R.

## Sheep Breeders' Associations

American Shropshire Registry Association, the  
largest live-stock organization in the world. Richard  
Gibson, President, Delaware, Canada. Address  
correspondence to MORTIMER LEVERING,  
Secretary, Lafayette, Indiana

Gushing Young Woman (to baronet at  
garden party).—Oh, Sir James, I hear  
you have an acetylene plant, and I sim-  
ply adore tropical flowers!

An industrious clerk who voluntarily  
worked overtime was locked in the office.  
Who can blame his employers for desir-  
ing to retain such an uncommon individ-  
ual at any cost?

## HOW MRS. CLARK FOUND RELIEF

### After Years of Suffering Dodd's Kidney Pills Cured Her.

Pleasant Point Matron Tells Her Suffer-  
ing Sisters How to be Free From the  
Terrible Pains that Make Life a  
Burden.

Pleasant Point, Ont., Nov. 16.—(Spe-  
cial).—That most of the ills that the suf-  
fering women of Canada have to bear  
are due to disordered Kidneys, and that  
the natural cure for them is Dodd's Kid-  
ney Pills, is once more shown in the case  
of Mrs. Merril C. Clarke, a well-known  
resident of this place and a prominent  
member of the Salvation Army. Mrs.  
Clarke is always ready to give her ex-  
perience for the benefit of her suffering  
sisters.

"My sickness commenced twenty years  
ago with the change of life," says Mrs.  
Clarke. "My health was in a bad state.  
Water would run from my head which  
would make me faint. When I came out  
of the fainting spells I took fits. I was  
bloated till I was clumsy. The pain I  
suffered was awful. It would go to my  
feet and then to my head. Many doctors  
attended me, and I tried many medi-  
cines, but nothing gave me relief till I  
used Dodd's Kidney Pills. The first box  
stopped the fits and seven boxes cured  
me completely."

Every suffering woman should use  
Dodd's Kidney Pills. They make strong,  
healthy Kidneys, and the woman who has  
good Kidneys is safeguarded against  
those terrible pains that make miserable  
the lives of so many women.

blooms per acre and plowed under the  
clover.

It is not scientific to grow clover and  
sell it from the farm or even to feed it  
if nothing is returned to the land.  
Clover can restore nitrogen and humus,  
but it is a gross feeder on other elements  
when it cannot restore.

The science of chemistry proves the ab-  
surdity of the great claims that the use  
of complete commercial fertilizer on or-  
dinary land is scientific. Chemistry dic-  
tates that fertilizer should be mixed on  
the basis of the elements in the soil.

A proper use of crop rotation is scien-  
tific, but science does not support the  
idea that any rotation can be depended  
on to perpetuate the fertility of the soil.

Much of the land has nitrogen in ex-  
cess of crop requirements, because crop  
growth is limited by an insufficient sup-  
ply of other elements. If those were  
applied, much nitrogen might be used  
which is now carried away in the drain-  
age water. A man who feeds young  
stock or milk cows on a corn ration is  
not making good use of the foods, but  
his loss is not so great as when he sup-  
plies his plants with a ration that is as  
poorly balanced. We have all seen corn-  
stalk growth sufficient to produce 100  
bushels, and the yield be not more than  
thirty-five bushels. The greatest natural  
waste in this country to-day comes from  
too wide a ratio in the plant-food ele-  
ments of the soil. Science teaches to  
economize our resources. (Mr. Mann  
found by field test that it did not pay to  
add manure to a soil which analysis  
showed to be already rich in nitrogen  
but low in phosphorus, while he found  
an application of phosphorus very profit-  
able. Science would apply the manure  
to another field in need of nitrogen.)

Science gives economy in showing the  
amount of treatment necessary as well as  
the kind. A field may have one type of  
soil containing 700 pounds of phosphorus  
to an acre in plowed soil and another  
type with nearly 2,000 pounds. The  
treatment that would be sufficient for one  
would not be for the other. One field  
might require one ton of lime to correct  
acidity and another require five tons.

Many farmers yet nearly have hysterics  
when anything is said about science on  
a farm. They look upon it as a very  
complex matter and dream of blast fur-  
naces, retorts, laboratories, etc. But  
those things are not necessary to apply  
science to farming. They may be nec-  
essary for someone, but not for the farmer.  
His course is a simple and easy one. It  
is to take what the experiment stations  
have prepared for him; and they make it  
so easy for him he doesn't even need a  
"shake before taking."

### ALL DAIRY SIGNS FAIL.

There was a cow show in the Island  
of Jersey last May. One hundred and  
twenty-six animals were entered in the  
test. The winner made 2 lbs. 11.5 ozs.  
of butter in twenty-four hours, and re-  
ceived the gold medal for producing the  
most butter. The curious fact is that  
there was not a man in the show, no  
matter how expert a judge he might be,  
who would have picked out this cow.  
Instead of having a thin neck, she had a  
thick one; instead of a long neck, a short  
one. Instead of a typical udder, she had  
a fleshy one. She was the most beefy  
looking cow in the whole number. There  
were a dozen cows there which, judging  
from the size of the udder, would have  
been bigger milkers; and yet this cow  
gave 48 lbs. 10 ozs. of milk in twenty-  
four hours.

It seems to be about as hard to pick  
out a first-class cow by looks as it is to  
pick out a first-class man or a first-class  
woman. We can find thousands of peo-  
ple in the United States who are not  
only better looking than President Roose-  
velt, but who at first glance would in-  
dicate greater ability. There is a gen-  
eral conformation that indicates intel-  
lectual and moral superiority, but to this  
there are exceptions. We once tried to  
pick out a preacher in a congregation  
and we picked out a somewhat noted  
tough.

Nevertheless, it is not wise to pick out  
thick-necked, beefy cows, with fleshy  
udders, if you want good milkers. There  
is more in a cow than appears on the  
outside. In this, as in everything else,  
"the proof of the pudding is in the eat-  
ing." In cows, as in men, the ancient  
rule holds good: "By their fruits shall  
ye know them."—Wallace's Farmer.

### Springbank Oxford Down Sheep
