

Greenwich

The meetings of the Community League have been much missed this winter, but owing to the young people being occupied in other ways, some attending Acadia, others working and some following up hockey matches, it has been thought best not to have many meetings. One evening those present much enjoyed the lecture of Professor E. D. McPhee, of Acadia, on "The League of Nations." Last week an interesting lecture given by the President, Rev. Mr. Watts, was thoroughly enjoyed. This week will be Social night and it is expected will be the last meeting of this year. A good time is expected.

The death of Mr. Gustavus Bishop takes away another of our oldest residents. Mr. Bishop was almost eighty years old. He will be much missed in the community, being a kind neighbor and friend to all.

The news of the death of the late Rev. E. B. Moore, a former pastor of this Church, was heard with deep regret by many in this place. His only son Dr. E. F. Moore is well remembered as a former doctor among us.

Miss Haydon, the County School Nurse, visited our school a couple of weeks ago.

Miss Lila Sherman has been ill with measles. Mumps is also visiting the place, Miss Eshter Pearson being one of the latest victims. Mr. Grant Murphy is also ill with them at his home, Port Williams. Both of these young people are much missed from the Post Office.

Mr. and Mrs. Lewis Forsythe have both been housed with La Grippe for several weeks. Their daughter, Mrs. Harry Stephens, with her two children, is spending several weeks with them.

The news of the arrival of the new doctor (Dr. E. H. Freeman) was gladly received in this community, it being the general opinion that he is much needed. Who will receive the first visit? A few of our residents are taking treatment and receiving benefit from Dr. Randell, Chiropractor, at Port Williams.

Miss Georgiana Belle, graduate nurse, who has been on duty at Dr. DeWitt's Hospital, Wolfville, all winter, is now stopping with her sister, Mrs. Cutler Forsythe, for a time.

Mrs. (Dr.) Bowles, formerly of Wolfville, is visiting her sister, Mrs. Byron Cox.

Mr. and Mrs. Lewis Shaffner, of Middleton, recently spent the week-end at the home of Mr. T. A. Pearson.

Mr. Butcher, of Halifax, spent the past week-end with his friend, Mr. H. H. Marshall.

Mr. Burpee Bishop has been ill for several days.

Miss Ethel Fraser has been very sick for several weeks.

We are sorry to report the continued illness of Mrs. Herbert Johnson. She is much missed in social circles.

Mr. and Mrs. Herman Porter, who have been living in Mr. Dexter Forsythe's new tenement house for some time, have moved to Town Plot. Mr. and Mrs. Lee Bishop, who have been boarding this winter, have rented Mr. Forsythe's house and taken possession.

Forsythe Bros., who deserve great praise for their energy in so quickly rebuilding their evaporator which was destroyed by fire in December, are now doing a rushing business and giving employment to many. They now have a fine up to date building.

Miss Lillian Bishop has recently had her home wired for electric lighting.

There was a young lady named Ruth With most of the sweet charms of youth, But alas, life is hard For her beauty is marred By the loss of a single front tooth.

The industrial outlook is better in Canada than across the border, or for that matter, than in any country at the present time.

Rheumatic Pains Have Disappeared

As a Result of Treating the Trouble Through the Blood.

The chief symptom of rheumatism is pain. The most successful treatment is the one that most quickly relieves and banishes the pain. Many rheumatic people suffer pains that could be avoided by building up the blood; when rheumatism is associated with thin blood it cannot be corrected until the blood is built up.

Mr. Ed Hall, Main-a-Dieu, N. S., suffered from rheumatism for years but was more fortunate than many victims of the disease for he found a remedy that so built up his entire system that he is now free from rheumatism. Mr. Hall says: "I was taken down with rheumatism, and at times was under the treatment of several of the best doctors in Cape Breton but they held out no hope for my recovery from the trouble. I was confined to bed for three years and a helpless cripple from the trouble. I could not move, and had to be turned in sheets. My legs and fingers were drawn out of shape, and sores developed on my body as the result of my confinement to bed. I was in this serious condition when a friend advised the use of Dr. Williams' Pink Pills and I began taking them. The first benefit I felt from the pills was an increased appetite, and then I began to feel stronger, and was finally able to get out of bed and go about on crutches. I continued taking the pills for months, slowly but surely getting new strength, and finally I was able to lay the crutches aside. I will always be lame, as the result of my long stay in bed my left leg has shortened somewhat, but otherwise I am feeling fine and able to do my work as Fishery Overseer. I may add that when the rheumatism came on I weighed 140 pounds and when I began going about on crutches I only weighed 67 pounds, and now I am at normal weight. There are many here who know and can vouch for the truth of these statements."

You can get these pills through any dealer in medicine, or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

That's Different

(From the Montana Farmer.) "Ethel," he whispered, "will you marry me?" "I don't know, Charlie," she replied, coyly.

"Well, when you find out," he said, rising, "send me word will you? I shall be at Mable Hick's until 10 o'clock. If I don't hear from you by then I am going to ask her."

She hurried up.

Marmaduke—"Before we were married she used to say 'bye-bye,' so sweetly when I went down the steps."

Montmorency—"And what does she say now?"

Marmaduke—"Oh, just the same old thing, 'buy, buy.'"

HOW TO KILL A SOCIETY

Eight Rules for the Annihilation of any Organization

Though the following advice was given recently by a man in the Popular Engineer, members of our women's organizations might find it valuable too when making their programs for the coming year.

Edward F. Williams says:

"Here are eight ways to kill an association:

"1. Don't come to the meetings.

"2. If you do come, come late.

"3. If the weather doesn't suit you don't think of coming.

"4. If you do attend a meeting, find fault with the work of the officers and other members.

"5. Never accept an office, as it is easier to criticize than to do things.

"6. Nevertheless, get sore if you are not appointed to a committee, but if you are do not attend the committee meetings.

"7. If asked by the chairman to give your opinion regarding some important matter, tell him you have nothing to say. After the meeting tell everyone how things ought to be done.

"8. Do nothing more than is absolutely necessary, but when other members roll up their sleeves and willingly, unselfishly use their ability to help matters along, howl that the association is run by a clique."

ASK LORD BEAVERBROOK

(From the Veteran, Ottawa.)

We are informed that one of the official Canadian war pictures, painted for the national memorial depicts a scene at the Second battle of Ypres. And that some of the Canadian soldiers shown on the canvas have Third or Fourth Division patches on their sleeves. How time did fly over there! Or is this a sample of "futurist" art?

NEWSPAPER ADVERTISING CHEAP

(William A. Thompson, Director, Bureau of Advertising, American Newspaper Publishers' Association.)

Newspaper advertising is much the cheapest of the printed mediums per thousand of circulation. Newspaper rates, like all other commodities, have advanced somewhat in the past couple of years, but they have not advanced in anything like the same degree that the materials and producing costs of newspaper-making have increased.

To illustrate the relative cheapness of newspaper advertising, let me say that for the money necessary to buy enough post cards at a penny apiece to send just once to the 28,000,000 purchasers of the daily English language newspapers, in this country, you could buy at least a page and a half of advertising in every one of the 2042 publications.

Probably there never was a time in our economic history when applied national advertising offered by the newspapers was so much needed as today. The selling costs of many national distributors are too high and the competitive condition into which we are moving threatens to increase these costs, and they must get these sales at the lowest possible figures. Increased railroad rates for transportation of all kinds must be reckoned with in sending salesmen and in shipping goods to any market. All these conditions point clearly to the wisdom of knowing your markets and cultivating business through advertising at points where it is profitable to operate.

Newspaper advertising will be used in great volume in 1921, because it offers to the manufacturer the two things which are essential today in advertising—efficiency and economy.

Foreign Basic Slag

Farmers who may be offered Foreign Basic Slag should carefully look into the question of quality and not allow themselves to be hoodwinked into thinking they are getting a better article than is actually the case. For instance the importers of this Slag talk of it as containing 17% Phosphoric Acid, or even 18%, whereas the foreign sellers offer the goods on the basis of 16 to 18% Phosphoric Acid, with a minimum guarantee of 16%, of which only 75% is Soluble. Divested of all camouflage, this means a Slag containing 12% Soluble, or in other words Available, Phosphoric Acid. Then again the guarantee of Fineness given with the Foreign Slag is only 75%, whereas the Sydney product is guaranteed 85%. This is a difference of vital consequence in getting results. Another thing that should be known to Nova Scotia Farmers is that sampling of this Foreign Slag is done at the foreign ports of shipment, and analysis is determined by foreign chemists. If any agricultural organization or individual is foolish enough to do business on such terms, why should Canadian Farmers risk their money in buying goods purchased on such ridiculous conditions? It is wise when offered Foreign Basic Slag to ask for:

(1) Guarantee of Soluble or Available Phosphoric Acid.

(2) Guarantee of Fineness.

and compare same with the guarantees given in connection with the Home Product. Do not allow yourself to be fooled into buying a Foreign Basic Slag simply because it is offered as a 17% or an 18% article. Investigate first, and so avoid useless regrets later.
