### FAIR SISTERS PUZZLE PRINCE OF WALES

An amusing incident of the Prince of Wales' Canadian tour comes to light from a small eastern Ontario town at the station of which the royal train stopped several times on its journeys back and forth between Toronto and Ottawa.

One evening, while the engines were being changed and car wheels tapped, the Prince came, on to the station platform for a constitutional. The usual crowd of on-lookers was there, and in his usual charming manner the Prince held a miniature court on the platform, shaking hands with all who presented themselves, including one of the town's fairest belles.

The news of the Prince's arrival was soon heralded about town and the crowd at the station was rapidly augmented, amongst the newcomers being the sister of the aforementioned belle. She got in the line-up for handshaking, and, upon reaching the royal visitor, was greeted by the soft English voice saying: "Oh, come, now, you're kidding me! I shook hands with you once before."

While the girls were not twins, yet they looked much alike. However, the Prince had to admit that it was he who was doing the "kidding" when the other sister stepped up and he saw them both together.

### GOOD INTEREST AND ABSOLUTE SECURITY

A liberal rate of interest with absolute security is the attractive offer made by the Minister of Finance to holders of the Canadian Government war loan bonds maturing December 1, 1922. The offer is not made to investors generally, but only to the holders of the bonds soon to mature. The bonds to be retired, bearing interest at five and one-half per cent., will be exchanged for new bonds bearing the same rate of interest. See the advertisement of the Minister of Finance.

### Homes Wanted!

For children from 6 months to 16 years of age, boys and girls. Apply to H. STAIRS, Wolfville. Agent Children's Aid Society.

## Exide BATTERIES

Demand a battery that gives you lasting satisfaction—plenty of power and care-free service. Then see that you get an Exide.

### HARVESTING THE POTATO CROP

**(Experimental Farms Note)**  
The potato harvest season extends from the middle of September to the middle of October. Usually at about this time we have settled dry weather, and it is of prime importance that weather conditions be satisfactory—heavy, damp weather and digging while the soil is sticky from recent rains, hinder all operations connected with harvesting potatoes, and finally endanger the keeping qualities of the potato after it has been placed in storage.

Digging methods vary according to the acreage, type of soil and locality. The digging machine, drawn by horses and used by growers with a considerable acreage, or owned co-operatively by a number of smaller growers, seems to be the quickest and most efficient method of harvesting. The chief disadvantage is that potatoes may be bruised more or less and partially to prevent this, it is recommended that the machine be set so that plenty of soil will be elevated along with the potatoes. It has also been recommended that the shufflers be removed when working in sandy or very light soil, as it is claimed that equally good work can be accomplished and the danger of bruising is eliminated.

Another and less expensive outfit is the double mould-board plough, with a distributor on the rear. This machine is used quite extensively in the heavier clay soils of Ontario, as the land is rather heavy for the easy operation of the digging machine mentioned above. The double mould-board plough works very well on lighter soils as well. For the small grower it is the cheapest outfit and can be used for drilling for mangels, turnips, etc. The least efficient and most laborious method of digging is by ploughing out with an ordinary plough followed by pickers and these followed by harrows, etc.

Potatoes should be picked and graded at the same time, that is, careful pickers will automatically discard scabby, rotten, small and affected potatoes. In this way a better keeping and a more saleable sample is secured. The small, sound potatoes are sometimes salvaged for use as seed the following year, but more often are gathered with affected ones and used for feeding live stock.

The potatoes, whether stored or intended for immediate shipment, should be dry and clean; if mud is adhering to them they should be spread out in a thin layer on the barn floor and left for several days until perfectly dry, so that, when handled, the mud and other accumulations will drop off. Otherwise, if placed in storage, the dampness will undoubtedly develop rot causing a continual re-sorting during the winter, and will further hasten early sprouting, which is undesirable.

Hot heads are a nuisance, of course, but a lot of people who keep cool get their temperature from their feet.

### VALUE OF COLLEGE EDUCATION

The tendency toward the scaling up of the wages for manual work so that they approach, or meet, or even pass the compensation paid for mental work is picturesquely illustrated by the case of a geologist in the U.S. Geological Survey, who, needing to have his house painted, found after close calculation that it would pay him to take absent leave without pay from his government work and do the painting himself. He did so, and the saving effected by using his own time instead of a union painter's time amounted to the cost of the paint. Another example is that of a geologist who was recently directing drilling operation of national importance, whose salary, however, was less than that of the workman who operated the drill. Both of these geologists had had not only college educations but long experience in the field.

However, the fact remains that at a period when the average college graduate cannot secure as high a wage as the average mechanic, the colleges are crowded as never before. According to the Engineering and Mining Journal Press of New York, the secret is after all, in the wider opportunities afforded by learning, whereby higher salaries are available to men of initiative and special ability than are accessible to either the average manual or mental worker; or, if the worst come to worst in the greater happiness, opportunity for sounder philosophy, and larger scope of interests which come with mental exercise and development.

The man who thinks he was a fool when he married his wife has a wife who knows he hasn't changed.

## To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

### CONVERSION PROPOSALS

**THE MINISTER OF FINANCE** offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, **GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.**

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds **AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th**, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unexpired coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,  
Minister of Finance.
