YOUR LOCAL NEWSPAPER

Aside from the limited number of single track minds found in every community, the people generally appreciate and accord liberal support to the local newspaper—that very intimate medium through which is mirrored each week the collective community activities.

Your home newspaper bridges the gap; its chronicles of local news and views complete a circuit of information impossible to attain through any other medium of human locomotion or mechanical device. It brings the local community as vividly to the fireside as the morning

It is a human institution, and therefore is imperfect; but the courag-eous and sincere newspaper unalterably stands four square for what it believes to be the ultimate good of its own district and province and country. Your home newspaper endeavors to radiate develop-ment in trade, health in the home, progress in civic affairs and good-will in the intercourse between them. In the performance of its ser-

win in the intercourse between them. In the performance of its ser-vice it is bound to run counter to the views of some—often of many: but if it hews to the line the chips of respect will not remain uncounted. Your newspaper, no matter what petty differences may arise, is the friend and advocate of every good citizen, although its paramount aim must obviously be a better destiny for the citizenship as a whole.

OUR PUBLIC SCHOOLS

With the re-openeing of the public schools which in the country districts takes place next week and in the towns the week following, activity along the line of what is unquestionably our most important institution will be in progress. While the lavish expenditure of money is unfortunately not always a guarantee of efficiency our schools de serve the very best financial support that we are able to give, but be-yond that they demand our very best interest. Frequent visits to the school on the part of parents and guardians of the pupils enrolled the school on the part of parents and guardians of the pupils enrolled is one of the very best means of ensuring effective work being done. At the best our schools fall very far short of what they should be. Too often incompetent and poorly trained teachers are permitted to wield practically the sole influence over our young people at the most impressionable time in their lives. Frequently what is regarded as an economical policy actuates those in charge of the management of the school to withhold needed equipment and accomodations with-out which no school can be profitably and safely carried on. The wise citizens will look into these things and insist that the training of those who are to take their places a few years hence in the responsibilities who are to take their places a few years hence in the responsibilities of community interests shall be made the best possible.

CURFEW NEEDED AT WOLFVILLE

The adoption of the curfew in Wolfville would, we sincerely be lieve, tend to the moral welfare of the youth of this community, as-suming, of course, that such a regulation was properly enforced. THE ACADIAN has no desire to unnecessarily multiply town ordinances and we are not unmindful of the fact that by-laws that have

nances and we are not unmindful of the fact that by-laws that have long formed a part of our civic code receive scanty recognition often times at the hand of the municipal authorities. That the public streets of any community are an unsafe place for boys and girls after nightfall will be readily admitted by thinking people and the moral upbringing of the young is the most serious problem at the present time which any community has to face. We have frequently been surprised at the number of children of tender years that are found wandering our streets at any hour before mid-night. Such neglect is a reproach to parental authority and a blot upon social life which cannot refuse to at least bear its share of re-sponsibility. In other places the curfew has proved effective in corsponsibility. In other places the curfew has proved effective in cor-recting an evil the results of which are in our day assuming perilous proportions.

BUSINESS GOES WHERE IT IS WELL TREATED

As has been previously and often stated in the columns of THE ACADIAN, the business man who sends away from his home town for his printing cannot consistently complain if the buying public fol-low his example and send elsewhere for their supplies. The "Trade at Home" idea is the only one which can bring to this community the full measure of prosperity to which it is justly

ARE YOU SUPERSTITIOUS

"A crack in your chimney is a sure sign that you are going to move. If you dream of smelling smoke it is a sign you are alseep and had better wake up. To see a paper-hanger, papering over a flue-hole indicates an impending loss. It is bad luck to look into a dark closet with a match. If you can see your shadow from an oil lamp while filling a gasoline stove it indicates a crowd of people com-ing to your house. When the wind moans it is extremely bad luck to burn trash-near the house. If you smell gas or gaso-line and look for it with a light it foretells that you are about to start on a long journey. Even if your house and furni-ture are "covered by insurance," it is extremely unlucky to have them burn on Friday, the 13th." Perhaps you are not superstitious and do not believe in signs. But these signs which are recorded by a Montana city official, have to do with man's most val-ued servant and most terrible enemy-fire, and we all should heed them. A crack in your chimney is a
