Bacon—Cumberland cut, 26 to 30 lbs, steady, 50s; short ribs, 16 to 24 lbs, quiet, steady, 49s 6d; short ribs, 16 to 24 lbs, quiet, 49s; long clear middles, light, 23 to 34 lbs, steady, 49s; long clear middles, heavy, 35 to 40 lbs, steady, 48s 6d; short clear backs, 16 to 20 lbs, steady, 46s; clear bellies, 14 to 16 lbs, quiet, 55s; shoulders, square, 11 to 13 lbs, quiet, 36s 6d. Last night at the police station the inquest on the death of the late Wm. Birkett was concluded. The witnesses examined were George F. Logan, fireman with Ross; John McLarty, engineer; Edward Dibb, brakeman, and Wm. Hoare, fireman on the Stratford train; John C. Elliot, a passenger, and Frank Sharman, the mail clerk. The evidence largely corroborated that given at the Monday night's session. The additional fact was brought out that when backing down, there was a red light on the tender of Ross' en-gine, while the regulations called for the use of a white light. Mr. Elliott said that Ross' engine was going very

The evidence was concluded at midnight, and the jury took two hours to reach a verdict. It was to the ef-fect that Conductor Birkett violated a rule of the Grand Trunk by stepping from a moving train at the East London station the night he met his death. The jury also reached conclusion that George Ross, driver of the engine which struck Birkett, broke one of the rules by having a red, instead of a white, light on the rear end of the tender when backing down the yard; and the jury further declared that Ross was to blame for failing to stop his engine when he saw the passenger train so near to

CYNICAL SNEER AT McKINLEY AVENGED

Seventy-Year-Old Veteran Punches Socialistic Orator in Style.

[New York Sun.] A socialist orator mounted a large box at Clinton and Broome streets on Sunday night and began to harangue a crowd about the grievances of the downtrodden masses. In the crowd was Louis Laubey, a veteran of the civil war and attached to the municipal court in Clinton street. Most of the crowd were in sympathy with the Finally, however, he made a slurring remark about President McKinley. "You're a scoundrel," shouted Lau-

am standing here."
"You shut up or I will call a policeman," retorted the orator. "This is a free country and we have free speech "Yes, shut up. Get him arrested,"

am standing here."

cried the crowd. "I mean what I say, don't you repeat that," shouted Laubey above the

The speaker did repeat the remark, and then something occurred which was not on the programme. Laubey, who is 70 years old, but spry, jumped their mark in style. The punching to guard carefully against impure several more blows, which was done so quickly that the orator was down and out almost before the been roughly handled if a policeman had not gone to his rescue with a

club. "Arrest him, arrest him," clamored the crowd. "Not on your life. I saw the whole thing. He did just right," replied the policeman.

He escorted Laubey into ex-Ald. Eisman's saloon on the corner. Then he came out and dispersed the meeting. Laubey received a sprained wrist as a result of the encounter, but he is as proud of it as if it were a gold medal. ously contributed towards the fund for the purchase of the 7th Regiment's 'That's the way to treat all those fellows," said he yesterday to the Sun colors, as published in Saturday's Advertiser, the names of Mrs. I. STOLE \$4,000 IN STAMPS. Moodus, Conn., Oct. 16.-The postoffice here was entered by burglars

Four city schools are closed today on account of the funeral of the late last night and money and \$4,000 worth of stamps were taken. Miss Edith M. L. Pope. They are the COMMERCIAL APPLE CROP OF Victoria, Wortley road and St. George's 1901.

New York Oct. 16.-The commercial apple crop of 1901, according to the final report of the American Agriculturist, is placed at 23,000,000 barrels, against 48,000,000 barrels one year ago and nearly 70,000,000 barrels in the bumper crop year of 1896. DR. POLLARD COMMITTED FOR

TRIAL. Toronto, Oct. 16 .- Dr. Stephen Pollard was committed for trial today on a charge of performing a criminal operation on a domestic named Mary Smith. Bail was fixed at \$10,000.

UPPER CANADA BIBLE SOCIETY. Toronto, Ont., Oct. 16.-At an adjourned meeting of the Upper Canada Bible Society board of directors last evening, Rev. Dr. Potts in the chair, Mr. N. W. Hoyles, K.C., was unanimously elected president of the society in place of the late esteemed Hon. G. W. Allan, who held that position for 42 successive years. Four colporteurs reported the circulation of 625 copies of the Scriptures in Muskoka, Algoma, Manitoba and the Northwest Territories during the month of September. Two bequests were reported in aid of the work of the society. Grants of Bibles in different languages were made for use in prisons, the Boys' Home and a Jewish mission for a district in British Columbia where 500 men of different nationalities are temporarily located.

PASSED 15 WORMS. I gave Dr. Low's Worm Syrup to my little girl, two and one-half years old; the result was that she passed fifteen round worms in five days.

SEVERE COLDS are easily cured by the use of Bickle's Anti-Consumptive Syrup, a medicine of extraordinary penetrating and healing properties. It is acknowledged by those who have used it as being the best medicine sold for coughs, colds, inflammation of the lungs, and all affections of the throat and chest. Its agreeableness to the taste makes it a favorite with ladies and chesten. Rimless Glasses, in gold and gold ADKINS, EAST LONDON,

LENGTH OF LIFE INCREASING!

Finding of the Coroner's Jury in the Case The Advance in the Average Lifetime Limit Due to Improved Sanitary Surroundings.

> [Cyrus Edson, M.D., The government bulletin showing that the length of life in the United States is materially increasing will be taken as a matter of course by all observing persons. It would be tonishing if it were otherwise. The great gain is in the lower death rate among infants, among children under five. The death rate among this class is very much lower than it was before, and by before I mean twentyfive years ago. The improvement within that period has been nothing short of marvelous. Children under the age of five are peculiarly susceptible to bad sanitary conditions, and it is along the lines of sanitation that we have made the greatest improvement in the period I speak of.

Adults live longer now that they used to because the conditions all about are constantly improving. The surroundings in every dwelling-place are better than they were, and, what is quite as important, the opportunities for getting good food are very much better. There is more money in circulation, people are more prosperous, and they are putting into their stomachs a higher grade of food than was the case twenty-five years ago. The question of diet has received very close attention, and on all sides new and neurishing foods have been put on the market at a very low price. The increase of knowledge, general knowledge, among the masses has to do directly with the greater longevity.

People in the ordinary walks of life who formerly knew nothing and cared less about hygiene, are well informed now through the great spread of practical knowledge by means of newspapers and periodicals. The reresult in that our people realize and recognize at once dangers to health and well-being that formerly had no existence for them. They see the pit-falls almost as readily as the most expert, and avoid them. Twenty years ago one of the most prolific sources of sickness was polluted water, the use of which was almost general. On the farms you would find almost invariably that the well and the cesspool were so close together that the water was of necessity deleteriously affected. Most people could not believe that so long as water was clean orator, and frequently applauded him. and sparkling it could carry contagtimes the most dangerous water is the "Don't you repeat that while I fifteen years ago, has been very large-

ly put under control. We have learned many other lessons in the past few years that help us to prolong life by avoiding fatal diseases. We know that contagion is carried by insects. We have learned the danger of promiscuous spitting and everywhere the health boards are having laws passed against it. We have learned the value of cleanliness. Among the masses, ten people bathe regularly now where one did a dozen who is 70 years old, but spry, jumped on the box and struck the orator a value of cleanliness in our food. We blow between the eyes which knocked realize the danger of keeping our suphim off the box. He followed this with plies in dirty ice-boxes, where food is several more blows, which reached readily decomposed. We have learned

Probably the most important item crowd realized what had happened. in this connection is the better under-Then, however, the bystanders crowd- standing that mothers have regarding ed around Laubey, and he might have the care and feeding of infants. There is, even in the slums, hardly a woman who has not within the past ten years had drilled into her a better understanding of the handling of children than was possessed formerly by women in our more pretentious house-The revolution in this respect holds. can only be appreciated by those who are brought in contact with the tenement dwelling. A feature that has materially de-

creased the death rate is the more rational system of amusement has come in within the last fifteen or twenty years. People have learned the danger of over-working and under playing; they go more to the theater and other places where they can relax their minds. They take vacations during some part of the hot months; they live out of doors as much as possible. Golfing, bicycling and other out-of-door sports have come in, to the great advantage both of our minds and bodies.

Cities, large and small, have learned to keep their streets clean, and clean streets have a direct bearing John Shipley, Mr. and Mrs. John Far- on the death rate. In New York I ish, and Mr. and Mrs. Edwin Rosser have seen the death rate go up and and Eli Rosser, of Falkirk, have re-turned from Buffalo. where they were were well or poorly cleaned. Towns of any considerable size have adopted fairly rational methods of sewage disposal.

In my opinion the future will show even a greater improvement, relatively, in the death rate than the past. have learned rapidly, but are only at the beginning. We have not yet begun to reap the full benefit of the knowledge we have already absorbed. There is reason to believe that within a comparatively short time the great body of our people will live to be 100.

CARRIE ON THE MIDWAY. Buffalo Express: Carrie Nation caused a mild sensation on the Mid-

way about 4 o'clock yesterday by being arrested. Mrs. Nation and her party were with Detective Vallely. who was escorting them through the Midway, when two exposition guards opportunity for choice and the smallest in blue uniform came up to Mrs. Na-tion and arrested her. They were acttion and arrested her. They were acting on orders from Director Cash, of the department of admissions and collections. Mr. Cash had heard that Carrie was selling her hatchets on the Midway, and so wanted that stopped until the rake off for the Exposition Company could be fixed. Carrie had a supply of hatchets with her when the guards overtook her on the North Midway. She accompanied the officers to the service building. As they entered the door to the service building Capt. Vallely stepped ahead of the guards and led Carrie into his private office. There she surrendered hatchets and the guards released her. She promptly returned to the Midway.

A HINT. "Mr. Bashful, how long have you een coming to see me? "About six years, Julie. Why? "Nothing; only I had a little argument with mamma about it this morning: She thought it was seven or eight. Isn't it a beautiful evening?" ing:

A UNIT THERE. "Is it true," inquired the friend, "that the doctors who were called in consultation over your husband dis-

'Yes," replied the widow. "They appeared to have agreed on one point only."

174 to 180 KING STREET, LONDON, ONT.

Literature.

The Atlantic Monthly, always first and foremost to come to the front in any great national emergency, stopped its presses, and postponed its publication to pay a brief but well-deserved tribute to the latest-and it is to be hoped, the last-presidential martyr, Wm.McKinley. The glowing words and sympathetic tribute of The Atlantic will sink deep into the heart of every true American man and woman.

The New Internal Bath, an Improved method of Flushing the Colon, and Giving Enemas for Acute and Chronic Diseases, my Laura W. Wright, M.D., illustrated, 56 pages, 25 cents., New York. The Health Culture Company, publishers, 483 Fifth avenue. It is claimed that "cleanliness is next to Godliness," but it has been considered that this applied only to external conditions. The writer of this emphasizes the importance of internal cleanliness of the body, and shows quite conclusively that there may be an accumulation of waste matter in the system, proving very poisonous and much more injurious than any that could possibly be found on the outer surface, and a new method of place of purgatives and pills, so often resorted to and so likely to leave bad

after effects. In this new health manual it is shown that by this system of irrigation, the poisonous matter may be drawn off from the system, sickness averted and health restored, in many cases that might become or have become chronic. The plan of carrying the cleansing fluid well up into the colon, instead of its discharge at the rectum, is one that appeals to the reader as being sensible, and likely to result in all that is claimed for it. All who have used syringes of any kind for flushing the colon will be interested in this new method. THE HAMLET OF EDWIN BOOTH.

Through his Hamlet, Edwin Booth made, upon the whole, his deepest and surest impression, says Henry A. Clapp, in the October Atlantic. In his performance of the part, there was retained to the last, consciously and deliberately, more of the old-fashioned formality and precision of style than he permitted himself in other imper-sonations, and the effect was sometimes that of artifice. But Mr. Booth elected to represent Hamlet in a style far less familiar and far more remote from ordinary life than he used for any other character in his large repertory. It was not that his Hamlet was all in one key; that its moods were not many and diverse; that the actor did not finely discriminate tween the son the prince, the courtier. the friend, the lover, the artist, and The contrary was true the wit. was as full of delicate and just differences as one could wish. But, through its prevailing quality, made constantly prominent by the tragedian's methods certain definite and necessary results were reached. Hamlet differs from Shakespeare's other tragic heroes both in his supernatural experience and in his unique spiritual constitution. . . . To Hamlet, by the conditions of his life and his soul, is given the largest

that closeness of association between dressing Table Talk, Philadelphia, Pa-Edwin Booth and Hamlet the Dane, which is to abide as long as the man and his art and his life are remembered. In his largeness and sweetness, his rare delicacy and sensibility, he was nobly human to the core, after the pattern of the most human of all the creations of the poet. Like the melancholy prince, he was required to drink the bitter water of affliction, and to hold his peace when his heart was almost breaking; and, in its extraordinary depth and reserve, his soul. even as Hamlet's and as Milton's, 'Was like a star and dwelt apart."

An unusual number of illustrated articles on a great variety of subjects will be found in the October magazine number of The Outlook. The list includes "The Episcopal Triennial Convention," by Florence E. Winslow; "The Unification of New York," by Thomas R. Dawley, Jr.; "Chicago's Book of Days," by Henry B. Fuller, author of "The Cliff Dwellers," illustrated by drawing from Albert Fleury; "The Making of an American," the last installment of Mr. Riis' autobiography; "The Wesleys and Their New Portraits," by the Rev. W. F. Withrow, D.D.; and "In the Mountains," by J. Cleveland Cady. In adtains," by J. Cleveland Cady. In addition there are full-page portraits of president and Mrs. Roosevelt, M. Wal-President and Mrs. Roosevelt, M. Waldeck-Rousseau, the late Bishop

Whipple, President Seth Low, the Duke and Duchess of York and others. "The Man From Glengarry," the new novel by Ralph Connor, the author of "Black Rock" and "The Sky Pilot," is continued. (\$3 a year. The Outlook Company, 287 Fourth avenue, New

The contents of The Popular Science Monthly for October, apart from reviews, discussions and notes, are: "The Progress of Science," Prof. R. S. Woodward; "Free-Will and the Credit for Good Actions," Prof. George Stuart Fullerton; "Fog Studies on Mount Tamalpais," Alexander McAdie; French Sardine Industry," Dr. Hugh Epidemic of M. Smith; "The Late Smallpox in the United States," Dr. James Nevins Hyde; "Food and Land Tenure," Edward Atkinson; "A Viking Philosopher: F.A.B."; "The Inert Constituents of the Atmosphere," Prof. W.

TOLSTOI ON CREEDS. In an interesting and suggestive

conversation with Tolstoi recorded in Frank Leslie's Popular Monthly for October, the talk turns upon creeds "But don't you still teach creeds it America?" Tolstoi asked me. we did not allow creeds to be taught in public schools. He asked me to excleansing is introduced to take the plain the public schools of America, which I did. "Oh, that is grand," he cried, "knowledge, true science for every child." Still, he said he under the impression that we taught Baptist, Presbyterian, Methodist, as well as the Catholic; they must teach the church beliefs somewhere." I said that in the parochial Catholic schools I understood there was a certain amount of the creed taught. your home, your mothers, your teachers, somebody, somewhere, teaches a great deal of church belief." I replied that some parts of the Bible, like the Sermon on the Mount and the Lord's Prayer, were read in our

s. hools. "That is good. How about the parents? Do they teach dogma to the infant? I had to tell the truth, that some of our mothers teach dogmas, but nearly all let the young brain of childhood form itself according to reason, and teach the child by example rather than precept.

"No creed should be taught a child," exclaimed the philosopher. When said that some parents are so afraid to wrong the child's intellectual free dom that they do not teach the child any religion at all, just hoping it will grow up and be converted. He said: 'Ah, that is fatal; religion, God, mortality, the divine, sublime. It wrongs the child for a parent to withhold strong definite teachings there. But religious and moral teaching should be all proved, all true, all scientific

The October number of Table Talk is unusually bright and interesting. It has a beautiful half-tone frontispiece, entitled: "Mark Hanna's Last Dinner Party in His Cleveland Home, to President McKinley." It is unusually well taken, and gives the names of all the guests at the table. It is, at this time, of interest to the people. This issue contains several half-tone illustrations of attractive dishes, with recipes and instructions how to prepare them. Back numbers will be sent free to any of our readers. or the October issue for ten cents, by ad-

The Amoor, the great stream of China and Siberia, is 1,500 miles in length, but for nearly nine months in the year it is ice-bound.

Harding Hall

LIMITED,

This popular girls' school has passed under the control of Mr. J. J. Baker, M.A. The former staff of teachers has been re-engaged, and strong additions made to the faculty. The first term be-gins Sept. 16, 1901. For particulars address
