

There are no less than four-teen remedies in this standard family medicine. Among them we might mention sarsaparilla root, yellow dock root, stillingia root, buck-thorn bark, senna leaves, burdock root, cimicifuga root, cinchona bark, phytolacca root.

Ayer's Sarsaparilla is certainly a medicine, a genuine medicine, a doctor's medicine.

Made by the J. C. Ayer Co., Lowell, Mass.

AYER'S HAIR VIGOR—For the hair. AYER'S PILLS—For constipation. AYER'S CURE FOR COUGHS. AYER'S AGUE CURE—For malaria and ague.

WOOD AND RAY GREAT FAVORITES

Put On Very Catchy, Neat, Clean Act at the Vaudeville—Moving Pictures at Grand.

A very fair audience were well pleased with the splendid vaudeville bill at the London last night. To those who have not visited the theater this week it may be of interest to point out that there are eight turns on the bill, besides the moving pictures and the illustrated songs and the catchy overtures of Prof. Stevens' orchestra.

One of the stars of the Wood and Ray—a whole show in itself. Miss Wood is a young lady of a refined, winning presence, and Mr. Ray is also an actor of the gentlemanly school. They carry with them a bunch of jokes that are jokes, and they hand them to the audience in a manner calculated to reach an ossified man and make him laugh. If Mr. Bennett had but this one turn on the bill the show would be well worth the price of admission. But there are half a dozen other turns, each excellent in its line, the whole combining to make up a magnificent vaudeville bill. If anyone is under the impression that the London vaudeville bill has been injured by the cancelling of a few acts, he should visit the theater and disabuse his mind of the illusion. As a matter of fact, never a week goes by that from two to five acts are not cancelled, or else refused to come, and yet Mr. Bennett always has a good show—a show which has attracted the people of London, and which has turned a former "dark" theater into a paying investment. The bill at the London is a good one and is worthy of liberal patronage.

The moving pictures at the Grand drew a large audience last night and for the most part the films were splendid. The programme was not, however, up to the standard of the night before, but as a whole the entertainment was excellent, and had it not been for a slight accident, which has since been remedied, the people who were present would have had no cause to complain. A complete change of pictures is promised for tonight.

The average vaudeville bill is a good one and is worthy of liberal patronage.

The best and healthiest trade in the world is that of dye making from coal tar. Tar and the smell of it is the best of all tonics and tissue-builders. The average vaudeville bill is a good one and is worthy of liberal patronage.

A Dollar's Worth Free To Any Rheumatic Sufferer

I ask no deposit—no reference—no security. There is nothing to risk—nothing to promise—nothing to pay, either now or later. Any Rheumatic Sufferer who does not know my remedy may have a full dollar's worth free to try.

I willingly make this liberal offer, because I know that Dr. Shoop's Rheumatic Remedy may be relied upon ALWAYS to bring the utmost relief that medicine can. Years before I discovered this remedy I studied the nature of Rheumatism. For Rheumatism is really

Crystallized Poison!

Your blood is always full of poison—the poison you eat and drink and breathe into your system. It is the purpose of the blood to absorb and carry away the very poison. And the kidneys, which are the blood filters, are expected to cleanse the blood and send it back through the system clean, to gather more poison, which they, in turn, will eliminate.

But sometimes the kidneys fail. And sometimes, from some other cause, the blood gets so full of poison that they cannot absorb it all. This is the start of Rheumatism. The poison accumulates and crystallizes. The crystals look like little grains of sugar or of fine white sand. The blood carries them and they increase in size. Then they can carry them no longer, it deposits them in a joint—on a bone—anywhere.

The twinges in your leg—the dull ache in your arm on a rainy day—these are the outward signs of the unseen crystals. And the twisted limbs and unspeakable anguish of the sufferer who has allowed his symptoms to go unheeded, which have come for years—the evidences of what Rheumatism, neglected, can do.

Rheumatism includes lumbago, sciatica, neuralgia, gout—for all these are the results of rheumatic poison in the blood. Finally, the first thing to do is to remove the poison. But this is not enough. The FORMATION of the crystals must be stopped, so that nature may have a chance to dissolve and eliminate the crystals which have already formed. This is done there can be no cure—no permanent relief.

I searched the whole earth for a specific for Rheumatism—something that I or any physician could feel safe in prescribing—something that we could always count on, not only occasionally, but ALWAYS. For the ravages of Rheumatism are everywhere, and genuine relief is rare.

I spent twenty years in experimenting

Mild cases are sometimes cured by a single package. On sale at forty thousand drug stores.

Dr. Shoop's Rheumatic Remedy

LADIES' BRANCH TO BE ORGANIZED

Farmers' Wives and Daughters in East Middlesex Will Have an Institute.

Meetings of the Farmers' Institute of East Middlesex were held in the I. O. F. Hall of Ilford, yesterday afternoon and evening. President A. O. Teifer, of Teifer postoffice, took the chair in the afternoon, when there was an attendance of about 80. In the evening, Mr. A. B. Scott, of Vaneck, presided, and over 300 farmers and their wives were present. The secretary, Mr. James Wheaton, issued a large number of membership tickets. The institute is indeed in a flourishing condition.

In the afternoon, Mr. Fred Sheppard, of Queenston, gave an instructive address, dealing with clover, corn and roots. The subject was well chosen as it is at present attracting a great deal of consideration. The speaker recommended the growing of clover for the good of the soil, and corn as an excellent feed crop. The advantages of the latter were that it yields so much tonnage per acre, and is a destroyer of weeds when properly cultivated.

A. P. Donaldson, of Fort William, Nova Scotia, gave an address on the subject of apple orchards. He recommended spraying three times a year if possible, and also that the orchards be carefully cultivated instead of being left to grow wild.

In the evening a lively discussion took place, led by Mr. Sheppard, on the subject of "How to Make Farm Life More Attractive." As two means to this end, Mr. Sheppard advocated the taking of active means to beautify the farm, and secondly, the keeping of the boys at home by giving them an interest in the work.

Mr. Donaldson also spoke in the evening, on the subject of the possibilities of agriculture. He advocated increasing the fertility of the soil by scientific fertilizing, and also by the education of the farming communities. An address, especially interesting to ladies, was given by Miss Blanche Maddock, of Guelph. She spoke upon the coming establishment of a farm-ers' institute for women in East Middlesex, as in other counties. This is to take place in June when Miss Maddock will again be present.

Some very enjoyable and well selected were rendered during the day by Miss Robson, of Ilford.

Certain Relief

The secret lay in a wonderful chemical I found in Germany. When I found this chemical I knew that I had found a Rheumatic cure that would be practically certain. But even then, before I made an announcement—before I made a dollar to put my name on it—I made more than 2,000 tests. And my failures were but 2 per cent.

This German chemical is not the only ingredient I use in Dr. Shoop's Rheumatic Cure—but it is the key to the whole. It made possible an achievement which, I doubt not, could have been made in no other way.

This chemical was very expensive. The duty, too, was high. In all it cost me \$40 per pound. But what is \$40 per pound for a REAL remedy for the world's most painful disease—for a REAL relief from the greatest torture human beings know?

I don't mean that Dr. Shoop's Rheumatic Cure can turn bony joints into flesh again—that is impossible. But it will drive from the blood the poison that causes pain and swelling. And then that is the end of the suffering—the end of Rheumatism. That is why I can afford to make this liberal offer—that is why I can order on your druggist, which he will accept as gladly as he would accept a dollar. He will hand you from his shelves a standard sized package and he will send the bill to me. There are no conditions—no requirements. All that I ask you to do is to write to me today. I will send my book on Rheumatism beside it. It is free. It will help you to understand your case. Address Dr. Shoop, Box 1, Racine, Wis.

The offer is open to everyone, everywhere. You have not tried my remedy. But you must write to me for the free dollar package order. I will send you a chance to dissolve and eliminate the crystals which have already formed. This is done there can be no cure—no permanent relief.

I searched the whole earth for a specific for Rheumatism—something that I or any physician could feel safe in prescribing—something that we could always count on, not only occasionally, but ALWAYS. For the ravages of Rheumatism are everywhere, and genuine relief is rare.

THE FRANKING PRIVILEGE

"Your gun" nor didn't seem to know his own mind," growled Seth's cabman through the hole in the roof.

"Follow him!" said Seth, whose blood was beginning to stir within his veins, as the lurcher or the sleuth-hound's will when hot upon the trail. Bartley Bradstone's cab pulled up at Ethelred Chambers, and, telling the cabman to wait, he went up the stairs and without knocking opened the door of a dingy office and walked in.

Ezekiel Mowle was seated at a table, his huge mouth open, his lantern jaws working eagerly as he sprawled over a desk, writing apparently for dear life. The office, the furniture of which would not have realized five-and-thirty shillings, was in extreme disorder, and a Gladstone bag was lying half-open on the floor as if it had been hurriedly thrown there.

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

"Mr. Bradstone," said Seth, with a start, uttering an exclamation, covered the paper before him with his huge, bony hand. "If his employer had been a ghost—and, indeed, Bartley Bradstone looked not unlike one—Mr. Mowle could not have been more startled."

Scrofula

Is very often acquired, though generally inherited. Bad hygiene, foul air, impure water, are among its causes. It is called "the soil for tubercles," and where it is allowed to remain tuberculous or consumption is pretty sure to take root.

Hood's Sarsaparilla Removes every trace of scrofula. Get Hood's.

For testimonials of remarkable cures send for Booklet, No. 1, C. I. Hood Co., Lowell, Mass.

too much time. With a "Well, good-bye, old fellow," the gentleman hurried on and left Bartley Bradstone standing with the paper in his hands, looking completely amazed.

The crowd of passers-by jostled him and pushed him all unheeded; but at last he seemed to awake, and hurrying forward, he began to examine the paper.

"Am detained. Shall be back in an hour."

Suspicious and bewildered, Bartley Bradstone paced up and down the office, then he went to a safe which stood in the corner of the room. Unlocking it, he began to examine its contents. Then he uttered a cry of mingled rage and despair.

[To be Continued.]

THE FRANKING PRIVILEGE

Members Claim It Is Being Abused—Seed Bill Put Through.

Ottawa, Ont., Feb. 28.—When the House met this morning, a separate school system for Alberta and Saskatchewan were presented by Messrs. Sproule, Bennett and Parr.

In committee the Minister of Agriculture's seed measure, was up for discussion, being finally put through. It now stands for the third reading.

The measure conferring Justice Killam from the supreme court to the railway commission was put through. An amendment to cancel the clause granting a retiring allowance was defeated 33 to 47.

Mr. Ames (Montreal) protested against what he claimed was an abuse of the franking privilege, by which circulars relating to dental supplies was being sent through mails without postage.

Sir William Mulock attributed the trouble to ignorance of new members, and suggested the abolition of the rubber stamp, so that members would be compelled to write their frank.

Sir William Mulock showed that no literature had been sent out with a member's frank since the session. The Postmaster-General showed that the Brookville postoffice had been checked and found to be in order.

In discussion of the vote of \$20,000 for archives, Mr. Fisher explained that it was intended to index the records of the House of Commons.
