NEW GERMAN COINAGE.

The German East African Company have coined an immen so amount of silver for use in that colony, and this week will see the new coinage on its way to Africa. The Germans declare that they will hold to Damaraland whether the English help them or not, and that the country will be developed both for its agricultural and mineral value. The announcement is a disappointment to an English syndicate that had been formed for the purpose of securing Damaraland as soon as the Germans should give it up, and which has resorted to contemptible methods in order to rid Africa in that quarter of the Germans.

Why Davitt Was Net Appelated.

London, April 20.—In the House of Commons, this evening, Mr. William Henry Smith, the Government leader, responded to a request for information as to the reasons which influenced the Government in declining to appoint Mr. Michael Davitt as a member of the Royal Labor Commission. Mr. Smith said that the evidence which had been submitted at the special Parnell commission in connection with Mr. Davitt's political antecedents and relations, coupled with the conviction of that gentieman in 1876 for treason and felony, and his sentence to 15 years penal servinde, had convinced the Government that he was a person unfitted to serve on the Royal Labor Commission.

Great Britain from the United States, and form all such American markets, including the carrying trade of the world. This policy may be narrow, selfish and unjust, and contrary to sound economical principles, but we cannot ignore it as futile, as the United States treasury is a formidable weapon to work with."

The European Situation.

BERLIN, April 21.—A pamphlet has appeared at Dresden which is causing a stir in the political world. Critics agree that if it was not written by Prince Biamarck it was inspired by that sagacious statesman. It has all the ear marks of Bismarck's atyle, and reads like one of his old Reichstag speches. The Brochure discusses the European situation and takes, for gratery and that the three determining factors of European nolitics are France's hatred of Germany, Russia's tendency towards Constantinople, and Italy's longing to recover Trieste. The writer takes a bold stating the triple alliance in its present form. He dares it is nonsense to suppose that Austria is in any peculiar sense Germany's natural ally, or that it would be fatal to incur her emity. It would be maintaining the triple alliance in its present form. He derived the correct of the rash death, but there is little doubt that the triple alliance in its present form. The theory failed to hold, however; an investigation showing that the diseased mest came from pigs born and raised in the locality. The evidence in this case happened to be conclusive, but in many other instances American pork has been made to bear the sins of the domestic article simply because the facts could not be traced.

An officer was sent to warn the fisherman, and if they refused to disperse he was ordered to arrest them. While carrying out his instructions the officer was set upon by some fishermen and severely injured. Then the fishermen indulged in riotous, threatening actions, in which they were aided and encouraged by some residents of St. Pierre. The Government has sent two cruisers to the scene of the trouble. Great excitement prevails here.

Poisoned By a Centipede.

LITTLE ROCK, ARK., April 21.—News has just reached here from Baxter county that a family of five campers named Baldwin, from Tipton county, Tenn., en route for Texas, had died in awful convulsions. The citizens suspected that a band of gypsies, who had been poisoning cattle in the adjoining country, had poisoned the spring near which the family had camped, and the lynching of the band has been imminent, and only postponed by the counsel of the cooler heads, who insisted that they must wait until they had positive proof. This wise counsel prevented a deplorable tragedy, as yesterday morning the remains of a large centipede were found in the coffee pot, out of which the campers had drank, and this deadly poison undoubtedly caused their deaths.
