Out of two thousand patients treated during the past six months fully ninety per cent have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent of attents presenting themselves to the regular practitioner are benefited, while the patent medicines and other advertised cures never record a cure a said. St rings with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claim; the catarrh is practically cured and the permanency is unquestioned, as cures effected by him two years ago are cured still. No one else has ever attempted to curedarrh in this manner, and no other treatment has ever cured cutarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment.
