

Hydro's Big Scheme

For Niagara Power

The plans of Sir Adam Beck regarding Niagara Falls power development, which have been considered on various occasions within the past few months by the Ontario Government, but which have not so far reached final endorsement, include the diversion of Chippewa Creek from its present outlet in Niagara River, above the Falls, to a point about one mile above Brock's Monument. It is stated that this scheme to provide additional power for the Hydro-electric System will cost about \$10,000,000.

By the diversion it is calculated a total head of water of 560 feet will be obtained. It is not the intention, apparently, to proceed with the work at once, but Sir Adam is said to be bestirring himself so that preliminary arrangements may be forwarded and all ready for the time when it is considered advisable to go right ahead with operations. It is understood that no great immediate expenditure would be involved. The financing will probably be along the lines of all the other Hydro-electric enterprises.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

A Tender Memory

Blessed is the memory of an old-fashioned mother. It floats to us now, like the beautiful perfume of some woodland blossoms. The music of other voices may be lost but her entrancing memory will echo in our souls forever. Other faces will fade away and be forgotten, but hers will shine on until the light from Heaven's portals shall glorify us.

When in the fitful pauses of busy life our feet wander back to the old homestead, and crossing the well-worn threshold, stand once more in the low, quaint room, as hallowed by her presence, how the feelings of childish innocence and dependence comes over us, and we kneel down in the mellow sunshine streaming through the western window—just where long years ago, we knelt by our mother's knee, lisping "Our Father." How many times when the tempter lured us on, has the memory of those sacred hours, that mother's words, her faith and prayers, saved us from sin. Years have filled great rifts between her and us, but they have not hidden from our sight the glory of her pure, unselfish love.

Costiveness and its Cure.—When the excretory organs refuse to perform their functions properly the intestines become clogged. This is known as costiveness and if neglected gives rise to dangerous complications. Parnee's Vegetable Pills will effect a speedy cure. At the first intimation of this ailment the sufferer should procure a packet of the pills and put himself under a course of treatment. The good effects of the pills will be almost immediately evident.

Montreal, Nov. 25.—The Montreal Chamber of Commerce is considering taking action with other such bodies in Canada to appeal to the federal government to remove from the tariff the duties on butter and eggs imported into Canada, with a view of having cheaper prices for the consumer.

Galveston, Tex., Nov. 25.—It was learned today that the commission for relief in Belgium has chartered five steamers which will carry cargoes of wheat from this port within the next few weeks. The first of these ships, the steamer Pholonia, docked today.

Thousands of mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Petrolia, Nov. 25.—The results of the vote for church union in the Presbyterian church have been just announced. The results are thus: For—Elders, 2; members, 15; adherents, 1. Against—Elders, 7; members, 182; adherents, 73. A total of 18 for union and 202 against it.

Winnipeg, Nov. 25.—James Lynn, who died at his home here at the age of 80, had been a resident of Winnipeg for the past four years, coming from Glenora, Ont., where he was a highly respected member of the community. He is survived by his widow, three sons and three daughters, all living here. He was a member of the Oddfellows and Orange order.

Warts are disfigurements that disappear when treated with Holloway's Corn Cure.

Ottawa, Nov. 25.—There is no confirmation here of the report that Henry Ford, the Detroit auto manufacturer, had taken a million dollars of the Canadian war loan.

INSIDE A VOLCANO

Looking Down Into Kilauea's Lake of Boiling Lava.

LIKE A PIT OF LIQUID FIRE.

A Play of Flaming Colors So Dazzling In the Darkness of the Vast Crater That It Terrifies the Spectator—A Veritable Fountain of Fire.

According to all the rules of school geographies, a volcano ought to be situated on top of a mountain; it ought to throw out stones and ashes and molten lava; its crater should be in the shape of an inverted cone, and should emit terrifying noises; periodically it should overwhelm a village or two. Kilauea, on the island of Hawaii, conforms to none of these specifications. It has thrown out neither stones nor ashes since it annihilated the army that was marching against Kamehameha, almost a hundred and fifty years ago. It retains its lava within its own crater, which is not shaped like an inverted cone. The sides are from 100 to 700 feet high and 7.85 miles in circumference, and the floor covers 2,050 acres. The volcano seldom makes terrifying noises—at least of the kind heard in imagination by a schoolboy. Thousands of people descend into the crater annually, and not one has ever been injured.

The walk across the floor of the crater, about two and one-half miles, is over a hard lava bed, more or less up and down, since lava hardens quickly and remains as it flowed, in great ropes and ripples. A few yards from shore—one comes naturally to call the bank "shore"—a ragged crack is crossed by a wooden bridge. At the time this crack opened, a large party was in the crater. They stayed long because they were delighted with the unusual activity of the lake and had no idea that this activity extended beyond the pit of fire until at last they started to go back to the hotel.

It was night, and as they approached the northern bank of the crater their lanterns suddenly revealed a huge fissure directly across their path. Already molten lava was bubbling up at the bottom. They followed the edge of the crack, keenly conscious, undoubtedly, as they turned to keep parallel with the crater wall, that they were on the inner edge. At last they found a spot where the lava had split unevenly, leaving a projecting ledge on which it was possible to stand, and so to jump to the other side. The whole experience, with the thought of slinking to the fires beneath or of being overwhelmed by the lava slowly rising in the fissure and the utter helplessness of their situation, was enough to test the most fearless.

Kilauea is really an enormous quiescent crater with an active inner pit. This cavity is, perhaps, 1,000 feet across, and its precipitous sides lead down to a lake of molten lava several acres in extent, sometimes higher, sometimes lower in the pit. This is Halemauama, which is commonly translated (although incorrectly), "the house of everlasting fire." It is certainly the house of the goddess Pele.

By daylight the lake of fire is a greenish yellow, cut with ragged cracks of red that look like pale streaks of stationary lightning across its surface. It is restless, breathing rapidly, bubbling up at one point and sinking down at another; throwing up sudden fountains of scarlet molten lava that play a few minutes and subside, leaving shimmering mounds that gradually settle to the level surface of the lake, turning brown and yellow as they sink. As darkness comes, the colors on the lake grow so intense that they almost hurt the eyes. The fire is not only red; it is blue and purple and orange and green. Blue flames shimmer and dart about the edges of the pit, back and forth across the surface of the restless mass. Sudden fountains paint blood red the great plume of sulphur smoke that rises constantly.

Sometimes the spurts of lava are so violent, so exaggerated by the night, that one draws back terrified lest some atom of their molten substance should spatter over the edge of the precipice. Sometimes the whole lake is in motion. Waves of fire toss and battle with each other and dash in clouds of bright vermillion spray against the black sides of the pit. Sometimes one of these sides falls in with a roar that echoes back and forth, and mighty rocks are swallowed in the liquid mass of fire that closes over them in a whirlpool, like water over a sinking ship.

Again everything is quiet; a thick scum forms over the surface of the lake, dead, like the scum on the surface of a lonely forest pool. Then it shivers. Flashes of fire dart from side to side. The center bursts open, and a huge fountain of lava twenty feet thick and fifty feet high streams into the air and plays for several minutes, waves of blinding fire flowing out

from it, dashing against the sides until the black rocks are starred all over with bits of scarlet. All sensations are submerged in a sense of awe. This vision of the earth building forces at work is a picture so overpowering that it is burned into the memory for all time.—"Hawaii, Past and Present."

Only a Near Bed.

Little Lola (in berth of the sleeping car)—Mamma, I want to go to bed! Mamma—Why, you are in bed, dear. Little Lola—No, I'm not. I'm on a big shelf.—Chicago News.

Away with delay. It always injures those who are prepared.—Lucan.

WATFORD PEOPLE

GET INSTANT ACTION

Those who have used it in Watford are astonished at the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. Because it acts on BOTH lower and upper bowel, ONE SPOONFUL Adler-i-ka relieves almost ANY CASE constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. Taylor & Son, druggists.

HOME HINTS

Some men respond very slowly to the touch of a woman's hand displayed in their homes and upon their surroundings. The task may seem hopeless to the wife at times. But sooner or later the effect will show itself. There is something in every man which responds to a higher influence. Let his home be rough and he will be rough. But infuse into that home a softening touch, be it ever so simple and the man feels it even though he may not directly notice it. He imbibes it unconsciously and its effect is sure upon him.

Nothing is of greater importance than the choice of friends. If your companions make you unhappy and discontented, if they rouse what is wrong and resentful in your nature, shun them as you would a hateful pestilence. If your companions help you to look at life hopefully, to labor cheerfully, and await results patiently; if they inspire you with bright, sweet thoughts and inspirations for whatsoever things are pure and noble, if they help you to live and to grow up to what is best in you then, grapple them to thy soul with hoops of steel.

The question of home amusements is one of much more serious import than is presented upon the surface. There are amusements and amusements, and parents should select for their children their amusements, just as carefully as they select their food, clothing or studies; for, as the child's amusements are, so will the child himself be. Children are more easily led than is at first sight imagined, and a judicious parent can create an interest in some pursuit that would have been utterly distasteful. There is so much to learn, and so much that is interesting and amusing in the process of learning, that it seems a pity not to cultivate in children an interest in solid amusements.

Seed corn, radish seed, cabbage seed, and other seeds threatened by birds or root worms may be saturated with common coal oil by dropping a small quantity into the seed and stirring it until every seed has been exposed to the fluid. The taste of the oil will keep the birds from pulling out the corn and the worms from eating the roots. Try your cabbage plants etc., when set out. The coal oil remedy may also be applied to seed grain and potatoes where the wire worms are threatening, a few drops at a hill; the cost is small, better than the loss of a good crop of potatoes.

To give warning of the presence of dangerous gases in mines a German scientist has invented a whistle on the principle of the safety lamp that is blown when the gases enter it.

A Texas inventor's automobile has two wheels on the left side and one on the right, so arranged that he claims no two of them will strike obstructions on a road at the same time.

Relieves Asthma at Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Addressing of Mail

In order to facilitate the handling of mail at the front and to insure prompt delivery it is requested that all mail be addressed as follows:—

- Regimental Number.
- Rank.
- Name.
- Squadron, Battery or Company.
- Battalion, Regiment, (or other unit) Staff appointment or Department.
- CANADIAN CONTINGENT.
- British Expeditionary Force.
- Army Post Office, LONDON, England.

Unnecessary mention of higher formations, such as brigades, divisions, is strictly forbidden, and causes delay.
