A cable despatch received from London states that Hudson Bay Co. shares have advanced to £21 per share. The par value is £17, and the stock has improved very considerably during the past few weeks. The vigorous land policy of the Company, and the improving prospects of the North West, are evidently the basis of this advance.

The Fredericton *Capital* says: A New York Company, with a capital of \$2,000,000, is going into gold mining on a large scale, on the Riviere du Loup. They have a "placer miner" from California in charge, who says he never saw richer indications even in that State or Nevada. Hydraulic mining will be employed. The formations which are thought so rich in the precious metal occur in New Brunswick.

MATERIAL FOR THE ST. CROIX COTTON MILL.—The promoters of this enterprise have been in St. John looking around for building material. It is said that, besides other articles, they will require 4000 hds. lime, 3,000,000 bricks and 1,000,000 feet hemlock logs. Here's a chance for somebody. They will probably buy their bricks and lime in St. John. The factory will be among the largest in Canada.—*Sun*.

Ottawa, June 4.—Dr. Fortin, M. P., has published a new telegraph chart, corrected to May 1881, of the Gulf and Lower St. Lawrence and the Maritime Provinces. It shows all the telegraph lines and cables, light houses, the electric signal stations in operation in accordance with the International code of signals, projected telegraph stations and the ordinary tracks of vessels.

Sackville, June 4.—At a meeting of the Board of Governors of Mount Allison Institution, held at Sackville last night, it was announced that \$1800 had been promised by four friends of the college toward making up the deficiency caused by the cessation of Government grants. The Quebec *Chronicle* of Thursday announced that His Excellency the Governor-General contemplates the establishment in Canada of an institution for the promotion of literature, somewhat analogous in character to the famous Academie Francaise, which is composed of a small number of members, elected by ballot by the Academie itself as vacancies occur in its ranks, and membership in which carries with it a small allowance.

Montreal, June 3.—From the returns of the enumerators already received, the population of this city has increased fully fifty per cent. in the past ten years, notwithstanding the reported exodus of our mechanics to the United States.

The question of establishing a woollen mill here is now being seriously considered, and subscriptions for stock are already being canvassed for, with successful results so far. Three or four thousand dollars have been guaranteed. It is proposed to commence with a \$10,000 mill, and extend as the business increases.—*Bridgeport Monitor*.

Montreal, June 3.—Mr. Joseph Mackay, whose death occurred last night, leaves a fortune of about a million and a half dollars. He, like some other members of the Mackay family, was unmarried. By his death the Presbyterian Church and public charities of the city have lost one of their greatest benefactors. He was the founder of the Mackay Institute, one of the founders of the General Hospital and the Presbyterian College, and has given away hundreds of thousands. He was particularly liberal in regard to Mission labors in the Canadian Northwest and in France.

Washington, June 2.—Sir Edward Thornton this afternoon gave to Secy. Blaine a draft on London for £15,000 sterling, the sum agreed upon as compensation for damages inflicted upon American fishermen in the Fortune Bay affair. STAMMERING CERTIFICATE.

We, the undersigned residents of North Sydney and vicinity, in Cape Breton, having known Miss Lawlor when afflicted with, and oftentimes pained to witness her struggling with the impediment (stammering), have now much pleasure in testifying, through this medium, that she has been relieved of the above referred to difficulty. She can now give utterance to her ideas with a freedom of speech at once, free, deliberate, and apparently, without effort. We learn from her that she attended, last December, the Stammering Institute of Halifax, in charge of Mr. H. B. Mackintosh, he having been empowered to use the method first known to, and practiced by, Prof. Sutherland, of London, Ontario. We heartily recommend those similarly affected as Miss Lawlor to avail themselves of the privilege of attending an institution calculated to render such valuable aid to both old and young.
