Urodynamic recorders

Current Export Markets

U.S.A., Europe

Company Summary

R.L. Medical Corp. began in 1967 as a service facility for repairing operating room equipment, then in 1983, the company began limited manufacturing of specialized hospital equipment. In 1987, after three years of extensive research, R.L. Medical introduced the UDS Laborie line of urodynamic systems. Compact and portable, they are the only computerized completely transportable units currently available on the market. At present, the company is developing a disposable incontinence surgical device. Future plans are to expand into the biofeedback and stimulation markets for incontinence and impotence.

Computerized, portable and easy-to-use urodynamic analysers from R.L. Medical.
