

Wheat Shipments.

The following letter from the Canadian Pacific Railway Co. has been posted in the Winnipeg grain exchange rooms:

Referring to the grain exchange meeting this morning regarding the handling of export wheat, oats and barley through the ports of Boston and New York, when your exchange unanimously named one, two and three hard as the grades of wheat to be shipped for export. As the trunk lines made no reference to the binning of Manitoba oats and barley, it is my understanding that such grain will be inspected on the Ontario standards and binned with similar grain shipped from Ontario and Quebec points. As there appears to be a surplus of barley and oats in the country for export I will be glad if you will have this matter disposed of as early as possible so that directions may be placed with our agents to properly handle the business.

With reference to cars of grain billed to New York and Boston for export that may miss grade in inspection at Winnipeg, the company will hold such cars for disposal by owners on track for twenty-four hours free of charge, after which car rental at rate of \$2 per car per day will be charged for detention, reserving the right to send the grain forward to Fort William elevator for storage, providing directions for disposal are not forthcoming after three days' notice is given that the grain is not of grade permitted to be shipped to New York and Boston for export.

A Toronto telegram says that the owners of the ten mills in Canada manufacturing wrapping paper have all but completed arrangements for the organization of a combine. The design is to limit the production and keep prices at a paying figure. All that now remains to be done is to secure the acquiescence in the agreement of one mill which is yet standing out.
