ZAM-BUK'S WONDERFUL WAY!

Whoever watches the healing of a wound, chronic sore, or diseased surface of skin with Zam-Buk, is face to face with one of Nature's greatest wonders. The healing process thus set in motion is nothing but a phenomenon of regeneration—a natural process of replacing destroyed tissues by new ones. The antiseptic substances contained in Zam-Buk, first attack and kill off the microbes or germs that are the cause of the inflammation or disease, and then the healing ingredients proceed to build up new tissue to replace that which has become damaged or diseased. New cells appear like a builder extending a new row of houses; the whole of the wounded area is gradually overlapped; and soon it is difficult to tell where the injuries or sores have been, so perfect and complete is the growth of the new skin.

is the growth of the new skin. Zam-Buk has more than fulfilled the expectations of its discoverer, and many medical men to-day freely extol its merits. It possesses a wide range of usefulness, being especially recommended for eczema, pooriasis, bad legs, blind and bleeding piles, running sores, ulcers, pimples, boils, rashes, raw chapped hands, scalp diseases, dandruff, barber's rash, raw chin after shaving, chilblains, sore and aching feet, cold sores, festering sores, poisoned wounds, cuts, bruises, burns, scalds, sprains, stiffness, weak ankles, swollen joints, and all diseased injured and
