Many schemes have been suggested to encourage manufacturers to locate in Toronto. Some of them are impracticable and others are too insignificant to result in much benefit, but Ald. Woods has hit upon or revived a scheme that deserves careful consideration. He that deserves careful consideration. He that deserves careful consideration. He thinks that one of the greatest inducements that Toronto can offer to manufacturers is cheap power. He does not propose to tap Lake Simcoe or get the power from the moon or any other visionary theory, but suggests that the city should instal a plant and furnish power, at cost to every manufacturer.

response to the complaint registered by Ald. Frame in behalf of many residents of the locality. Dr. Sheard finds that it is not a nuisance and will report to that effect to the Board of Health. Should it become a nuisance it will be promptly dealt with. Ald. Infected Milk Supply.

Dr. Sheard, after a most careful investigation, has come to the conclusion that many of the cases of scarlet fever can ple traced to infected milk supply. He has felt justified in closing one large dairy and will take further steps to prevent infection from this source. It is thought that the infection can be traced directly to bottles returned imperfectly cleaned from infected houses.

Our I's are just as strong as they were fifty years ago, when we have cause to use them. But we have less and less cause to praise ourselves, since others do the praising, and we are more than willing for you to see us through other eyes. This is how we look to S. F. I believe Ayer's Sarsaparilla to be the best blood purifier, that has been introduced to the general public." This, from a man who has sold thousands of dozens of Ayer's Sarsaparilla, is strong testimony. But it only echoes popular sentiment the world over, which has, "Nothing but words of praise
