ARNOTT INSTITUTE
The work of the ARNOTT INSTITUTE in treating Stammerers and Stutters is becoming more and more widely recognized as perhaps the most successful on this continent. Following our own scientific methods, the Institute treats the CAUSE of stammering, not the habit itself. It teaches the student why he stammers, and once he understands that, it is comparatively easy for him to learn, in from five to eight weeks, how to speak fluently and naturally, without any of the objectionable mannerisms commonly taught. As he knows why he is speaking correctly, the cure is permanent. If you know anyone who stammers or stutters, in kindness to them advise them to consult the ARNOTT INSTITUTE.
