

These are very painful, and their
tacks often sudden, and sometimes fe-
brile. The disease is usually accom-
panied by vomiting, and sometimes
cramps, producing severe twist-
ing pains, and often accompanied
by diarrhoea. In some cases, how-
ever, there is only one remedy to be
used, and that one is Dr. Fowler's
Purifier of the Blood. It has a
cord of cures extending over sev-
eral years, and we have yet to hear
of a case in which it failed to either
cure or relieve.

Beware of imitations and subse-
quent disappointments. Do not buy
or ask of greater profits, for these no-
reputation, worthless preparations
are everywhere.

Mrs. H. Miller, 783 Mark street,
Wilmington, writes: "Last sum-
mer I was afflicted with cholera, and
could hardly straighten up for a
week. The first thing I gave him was a
dose of Wild Strawberry. It had a
berry, and I hadn't repeated it yet
until he was all right again. It is
only remedy I give my children in
summer for cholera or cramps in
stomach. I have never been with-
out it since."

Price, 50 cents a bottle by the T. T.
Company, New York, and Q. T. Co.,
Boston.
