

Holds a Meeting and Talks of Many Things.

The Clondyke Trade-Bad Telegraph Service the Cause of Complaint -Other Matters.

From Tuesday's Daily. The first meeting of the new council of the Board of Trade was held yesterday afternoon with the president elect, Mr. G. A. Kirk, in the chair. The first business considered was the making of several small amendments to the annual report, which was finally referred to a committee for final revision.

Col. Baker's report of emigration was then read and it will be published in the apendix. The report was as follows: "I am able to give a satisfactory report of the immigration to the province for the past year.

It may be understood that the government discourages pauper immigration because there is no difficulty in finding labor for the promotion of the vacious industries of the province. But in view of the fact that notwithstanding the favorable conditions for agriculture, both as to land and climate, which exist in many parts of the country, we still import nearly two-thirds of the food which is consumed, it is manifestly advisable to encourage, as far as possible, the set tlement of farming colonists who have each a small capital sufficient for the establishment of an agricultural home. If such settlers are scattered over the large area of our province, they may grow crops in abundance; but they cannot in many cases, find a market for their produce for want of facilities for communication. It is therfore advisable to give every encouragement to immigrants to combine in colonies on such points in the province as will put them in touch with the great cities as markets for their produce. This has been done in the case of Bella Coola, on the northwest coast of the mainland, and at Cape Scott and Quatsino, on the north of Vancouver's

Island. At Bella Coola there are now over two hundred Norwegian colonists, including, ing men, women and children, and more are expected in a few months. They are establishing comfortable homes, and are well satisfied with the locality, which is very favorable for agriculture. Both men and women find work at the canneries during the fishing season. A wharf has been built at the head of the inlet, which admits of large steamers coming alongside, and a wagon road is continued from the wharf through the settlement. A trail has been opened up from the settlement into the rich grazing grounds of the interior, which admits of cattle being handicaps British Columbians in competdriven down for shipment at the wharf. | ing with American firms. Several promisng mineral claims have
