**MASSE & PATTERSON,**  
10 South Main at W. Mart.

**Finer Haddies.**

JUST received from Dibley—20 dozen Finest  
Haddies, in prime order.

**R. E. FIDDINGTON & CO.**

# The Daily Tribune.

J. L. STEWART, EDITOR.

FRIDAY EVENING, APRIL 13.

Methodists and Separate Schools.

Do the Methodists advocate Separate Schools? Dr. Stewart and Prof. Burwash have been meeting in St. John on behalf of the Educational Society of the Methodist Church, and the Tribune thinks that denominational schools is the only logical conclusion that can be put by their arguments.

Methodists cannot make such appeal on behalf of Methodist Schools, without endorsing the separate school doctrine of the Catholics. Why not? What inconsistency is there in supporting both non-Sectarian common schools, and Sectarian high schools and colleges? The subjects that we fight against Sectarianism in common schools do not exist in respect to colleges.—*Borderer.*

The editor of the *Borderer*, not having heard of the separate schools which we characterized as logical endorsements of the Catholic school doctrine, does not interpret our remarks correctly. We see no inconsistency in the case as put by our contemporary. We endorse every word that has been said in behalf of the excellent educational institutions at Sackville, and hope they will be liberally supported by the denomination to which they are a credit and by the public in general. Those institutions have done a vast amount of good, and are calculated to do more. We have been hoping that some rich man would transfer a hundred thousand or so of his surplus to its endowment fund, thus enabling it to be comparatively independent, and we hope so still. There are many rich men in New Brunswick and Nova Scotia who might do this.

We believe it to be an excellent thing to have denominational institutions of learning for children who are old enough to know what particular line of study they wish to devote themselves to, and do not like the prevailing tendency for establishing common schools of so high a grade as to render Colleges and Universities almost superfluous. The duties of the State, as an educator, ought to stop after the children are given the preliminary instruction necessary for making them intelligent citizens. If this is not the limit, where will the line be drawn?

The remarks of Dr. Stewart, Prof. Burwash, and others, to which we objected, were not appeals on behalf of the M. A. institutions, but general expressions in support of religious education for the young and in condemnation of schools that laid pupils exposed to the dangers of the scientific skepticism of the day. Dr. Stewart in particular, in one of his educational sermons, called for a rally on behalf of religious education, meaning, evidently, the establishment of schools where religious and secular instruction would be combined, as "the only safety from the infidelity of science on the one hand and the superstitions of Rome on the other." It was not an appeal for the support of a denominational College, but for denominational (or, say, religious) education in the schools. The remarks of other gentlemen, particularly some remarks on the Bible in schools, were inconsistent with the broad sense of ideas on which, and on which alone, non-Sectarian common schools should be justified. The State should teach citizenship, and leave parents and pastors to inculcate creeds—Christ's followers to teach Christianity. Separate school arguments can not be combined by those who denounce schools which teach religious exercises or instruction as dangerous, and we must either establish separate schools or support our present system, so far as its proper limits extend, in its integrity.

**810 a Day—Suggestions.**

The *St. Croix Courier*, as was to be expected, in its issue of the 10th inst., condemns the present office, although it is very instrumental in securing the return of the four Charlottetown members who were among the Forty. The *Courier* "sees no reason why the session should extend over a long period, and therefore wishes that the sessional allowance of three hundred dollars, which has been fixed by the present House, be excessive." Ten dollars a day for the services of the average legislator is pretty steep. What a pity it is that Henry Vachey, or the like, who denounce schools which teach religious exercises or instruction as dangerous, should be so worthy successor of the late Edward Knapp, had not visited Fredericton during the session and awakened in the bosoms of the majority of the members some concern for the safety of their sons! We suggest the pledging of the injunction—"Thou shalt not steal!" over the entrance of the House of Assembly chamber. Now that members have got the coveted \$300, and will doubtless hold on to the spoil, it would be well to have a bar, suspended imposing a fine of \$10 a day on each member for every day exceeding thirty that each session lasts. People would be reconciled to the grab if the sessions could be shortened to a month.

**The Sugar Question.**

The blunders, maddens, and speculators in imports, now composing the Cabinet of Canada, are at their old tricks of unsettling trade by tampering with the tariff, and the sugar dealers the victims this time. After having, in compliance with the unanimous voice of the commercial men of the country, backed out of their policy of placing an extra burden on sugar consumers for the benefit of a Montreal refining firm, these substitutes for Cabinet Ministers have taken it upon themselves, after giving their usual timidity to their business partners and agents, to change the tariff at their own arbitrary will. But they either have no

idea just what they intend to do, or how far they intend to go, or else their private sugar speculations are not so far advanced that full information can be given to the public, as great uncertainty still exists among importers.

One newspaper man learned from the Collector yesterday that once a pound would be added to American sugar in value, although the absurdity of such a thing seems to be something to be great even for this Government to order, and the representative of another journal was informed that no such instructions had been received.—The Collector, in fact, does not seem to have received intelligent instructions at all. The importers are awaiting some definite information. What will be the next Ministerial job? What trade will be disturbed next for the benefit of some Ministerial firm?

**Trade of St. John.**

Comparative statement of imports and exports at the port of Saint John, N. B., during the three months ending March 31st, 1874, and March 31st, 1875, respectively, showing the different countries with which the quarter's trade has been conducted:

1874.	Value of Imports from Exports to	
Great Britain,	\$890,415	\$110,872
United States,	600,993	88,587
Germany,	5,177	
Br. West Indies,	518	3,990
Spain and Portugal,	45,068	27,728
French W. Indies,		
South America,		4,400
Dominica,		2,790
Totals,	\$1,400,166	\$148,277
Customs duties collected during the quarter,	\$138,055.97.	

**1875.**

Value of Imports from Exports to		
Great Britain,	\$562,606	\$78,296
United States,	548,767	48,966
Germany,		6,080
British West Indies,	814	18,818
Spain and Portugal,	39,979	142,366
Haiti,		11,441
South America,		11,001
Dominica,		1,729
Totals,	\$1,152,185	\$312,457
Customs duties collected during the quarter,	\$141,870.88.	

The Nova Scotia Government bid higher than the Opposition leader for support of the unpledged members of the Assembly, and the want-of-confidence motion was lost. Now that Mr. Annand has got his Government firmly seated he is ready to hand over the reins to his successor and leave for the scene of his emigration duties in London.

The *Borderer* denounces the unlicensed liquor shanties of Sackville.

Some of the St. Stephen people are planning new projects for the city.

Mr. Bend J. Kelley, of the Chateau firm of Kelley, Wadsworth & Murdoch, died at that place on Wednesday.

Fredericton jail came near being burned down the other night, through having improperly constructed chimneys.

It is said that John J. Cole, repeated owner of the Trotter, County, has made an assignment under the Insolvent Act.

The *Standard* flatters itself that several families from Ontario and Quebec will be in their residence in St. Andrews during the summer.

The style of Fredericton's new City Hall is to be Gothic, of the Venetian type, the walls being faced with pressed brick, relieved by finish bands or bond stones of olive-tinted freestone and stone string courses and window heads. The estimated cost is \$350,000.

The Postmaster General thinks the postal business of Fredericton is not sufficient to warrant the erection of a new post office, and says that there are towards 4000 inhabitants in Ontario contributing more largely to the postal revenues of the country than Fredericton with its 700 inhabitants.

St. Andrews needs a new 1874-Office. At the present time the postmaster sits himself up in a den about the size of a good packing box, while the public stand on the sidewalk and receive their letters from the window. In our changeable climate it is not all that good that could be desired, and it is not surprising people have begun to realize the fact. A correspondent of the *Standard* speaks of it as a "misérable, narrow, contracted, dirty little hole that was good for nothing but to keep the wind off the face of the man who sat in it." It is not surprising people have begun to realize the fact. A correspondent of the *Standard* speaks of it as a "misérable, narrow, contracted, dirty little hole that was good for nothing but to keep the wind off the face of the man who sat in it."
