

The Hamilton Tractor Plow

A Better Implement Does Not Exist

THE **Hamilton** tractor plow scours under adverse conditions. It turns a smooth furrow and provides a compact seed bed, putting all trash in the bottom of the furrow. A wide range of close adjustments enables the operator to turn a furrow of the exact depth required. When opening the field, the front bottom can be adjusted to turn a furrow of any depth.

The quick-detachable-share arrangement is one of the special features of the **Hamilton**. The shares can be removed without the use of a wrench. It requires only a few minutes to unscrew the hand nut or wheel and kick the share off the plow. There is no time wasted--the change can be made in a very few minutes. Any man who knows plows will appreciate this feature to the full.

This is the power lift plow--meaning that the tractor furnishes the power to lift the plow. A slight pull on the rope by the operator from his seat raises and lowers the bottoms—a very simple and easy operation. The lift is high with good clearance. Levers which are long and convenient are in easy reach of the operator and govern plowing depth.

The **Hamilton** tractor plow is substantially built throughout. The beams are exceptionally heavy, of high grade carbon steel, rigidly fastened together by heavy braces. Two or three-bottom sizes. The hitch has good range of adjustment up and down and sideways. Careful protection is made against dust getting into wear bearings. Wooden break pin is to minimize danger of damage to plow.

Purchasers of **Hamilton** tractor plows have for years assured themselves of plowing and satisfaction and will now be more certain than ever of good plowing. No better implement exists than the **Hamilton** tractor plow. Write the nearest address below for complete information.
