beg to inform their beg to inform their beg to inform their beg to the they have rowers, where in additions, they have compring of fine Feathers and widths. A call Remember, 97 King 136

ntity, Prices STARK. nge St.

—Mr. John Magwood, Victoria Road, writes: "Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure is a splendid medicine. My customers say they never used anything so effectual. Good results immediately follow its use. I know its value from personal experience, having been troubled for 9 or 10 years with dyspepsia, and since using it digestion goes on without that depressed feeling so well known to dyspeptics. I have no hesitation in recommending it in any case of indigestion, constipation, heartburn, or troubles arising from a disordered stomach." Girls of a marriageable age do not like to tell how old they are; but you can find out by

tested by witnesses, and sent this precious document to the Pope, who, with good sense, took no notice of it; at least no public notice, though it is probable that he administered a sharp private reprimand, for Hohenlohe collapsed very speedily.

—Life saved at midnight by the timely use of West's Pain King. Do not fail to always keep it in the house for attacks of colic, cholera, cholera morbus, cramps, flux, dysentery and all kindred diseases, always.very sudden. Be prepared, 25c. All druggists.

cable breaks, the elevator will remain suspended. There has never been an accident on the Right, and M. Elifel, who is the originator of this stupendous scheme, says his elevators will be even more secure than any yet constructed. A vertical elevator will also take passengers from the central point to the summit of the tower. When at the toy we can admire the night, Paris and the millions of lights.

In pleasant weather we can see the most splendid panorama that human thought can imagine. Above the hills which with their green foliage surround Paris we shall have a view of over one hundred miles. We shall see Compiegne, Rheims, Fontainebleau, Chartres, Dreux, Creil, the villages lost in the woods and the rivers trailing their silver ribbons across the valleys.

But this metallic tower will not be beniff expressly for the curious; it will render service to scenece. In the cupols will be installed telescopes, pulviometers, anemometers, etc. Astronomical and meteorological observations will be made under new conditions, and experiments which have heretofore been impossible can for the first time be attempted. Atmospheric electricity, the velocity of the wind, the transparency of the air, Foucault's experiment to prove that the earth revolves, all can be studied. Spectroscopes for analysis of the light of the sun and stars will be placed under the dome. A study equally interesting will be that of the variation of temperature with altitude. For the public a very strange sight will be the effect of lightning and the deviation of a falling body.

The tower will be surrounded by a lightning rod, but in itself the tower will be glaced for the young and formidable quantities of electricity. In a thunderstorm everyone in the tower will be struck by lightning, although unconscious of and receiving no injury from this electric process and receiving no injury from this electric process.

immense lightning-rod, by which will descend formidable quantities of electricity. In a thunderstorm everyone in the tower will be struck by lightning, although unconscious of and receiving no injury from this electric shock. When the night is black with clouds from the foot of the tower one can see s continuous sparkling fall of lightning. To produce that effect a lightning-rod will be placed on the summit of the tower and the conductor will be interrupted for the space of two yards. The lightning will thus jump from one section to another, with continual explosions.

At the base of the tower, on immense blocks of marble, inscriptions recalling the history of the century will be engraved in gilded letters. There will be found extracts from the names of illustrious republicans, etc. The weight of this tower will not be greater than 7000 tons, almost enough iron to make a railroad from Paris to Saint Germain by way of Versailles. The cost will be about \$1,000,000, but the inventor of this gigantic work asks only the admission fees for ten years to pay all the expenses of the building.

Odd, rich and poor, and is rapidly be coming the most popular medicine for cholera, dysentery, etc., in the market.

The Yender-Working Frince Backender-From the Gentleman's Magazine.

The Prince practiced his miracle working at the palace in the presence of the Crown Prince and the Prince of Esterhardy, the Austrian Ambassador, who was on his way to London to attend the coronation of George IV, in July. The Prince was somewhat discourage at the invitation of the physicians attached to the Julius Hospital, he had visited that indi-louding the complex of the Company of

He Didn't Want the Earth. From the Lynn Union.

He said he had no wish to be opulent, with a bank-book rotund and distended and corpulent; but he didn't wish to live like the primitive quakers or butchers or bakers or candlestick-makers, but in a fine brown stone surrounded by statutes and set in a lawn of some forty-seven acres.

He wished no small army of liveried dependents, no uniformed lackeys and cringing attendants; but he didn't wish to live like a hermit or miser, but in plentiful leisure as better and wiser; and some twenty servants and forty good waiters would make like worth living for him and Eliza.

British mails depart as follows:
July 1, 3, 6, 7, 8, 12, 13, 14, 15, 19, 20, 21, 22, 24, 25, 27, 23, 29.

Time for dosing English mails, 6 p.m. on July 7, 14, 21, 23, and 9 pm. on all other days.

Letters for passengers on incoming and or outgoing Allan steamers abould be specially handled in at the bequiry wicker.

pulent; but he didn't wish to live like the primitive quakers or butchers or bakers or candlestick-makers, but in a fine brown stone surrounded by statutes and set in a lawn of some forty-seven acres.

Applause for dear clothing was not worth the winning, he desired no wardrobe of purple and linen; but he didn't wish to go attired like a sailor or dress in a uniform suit like a jailer, and all that he wished was some two dozen changes made up in good style by a fashionable tailor.
