

You Never Can Make Butter With the Butter Fat that's Lost

Either in the skim milk or on account of churning
thin watery cream.

Cans, pans and cheap machines to the rear

DE LAVAL CREAM SEPARATORS

ARE BEST.

173-177 William Street,

MONTREAL.

NOTICE THE TEETH

In considering the purchase of a Spring-Tooth Cultivator, notice the Teeth very carefully. They are one of the most important parts of this kind of an implement. It depends upon the Teeth as to how well it does its work. See that they are of proper length, proper shape and temper that the points are reversible, for that means double value to you. Next see that the frame is simple and strongly built of steel and malleable iron so that it will stand the strain and wear well. Ask our agent about a

FROST & WOOD

"CHAMPION" SPRING TOOTH CULTIVATOR

you will see a machine that embodies all these good points. He will tell you that the Teeth are tempered in oil and tested that they are made of Creable Spring Steel, and the reversible points are an especial advantage as when one becomes worn by hard, stony ground it can instantly be reversed, and you have a new sharp point. Teeth can be spread or taken off, when used for corn or root crop cultivation. It is an implement that gives perfect satisfaction, because it does perfect work and stands rough wear. Our Free Catalogue gives more good points. Write for it, or get it from our nearest agent.

The FROST & WOOD CO., (Ltd.), Smith's Falls, Can.

Wanted—Brakemen and Firemen Salary—\$75 to \$150 a month.

We teach and qualify you by mail. Course simple, practical and thorough. After eight or ten weeks' study we guarantee to assist in getting you a position on any railway in Canada. The first step is writing for our booklet.
