

NOTICES.

American Hereford Record.—Vol. XXII. of the American Hereford Record contains no less than 10,000 pedigrees of animals recorded by that Association, numbering from 95,001 to 105,000. The frontispiece is an illustration of Aaron 94447, a prominent representative of the breed. The secretary of the Association is Mr. C. R. Thomas, Independence, Mo.

Stock Book Free.—The \$3,000 stock book referred to in the advertisement of the International Food Co., Minneapolis, Minn., U.S.A., is an interesting volume for its varied and helpful information as well as its hundreds of fine illustrations. Among the portraits produced are those of Rysdyke's Hamiltonian 10, his sire and grandsire; Imported Messenger; Robert J., 2,014; Directum E., 2,05; Star Pointer, 1,594; George Wilkes, 2,22, and others of similar importance. The volume has extensive departments for horses, cattle, hogs, sheep, poultry, and veterinary.

Well-Drilling Machinery.—Where one has to go down through hard, firm soil, and perhaps rock, to get good water, and only good water is fit to use, the old process of digging with shovel, pick, explosives and windlass is too slow and dangerous for the advanced age. And when we have a large well of the old-fashioned sort, every opportunity is afforded for surface seepage of a foul nature getting in to contaminate the water. Even when well water is cool, clear and sparkling it may easily contain deadly germs—the forerunners of ill health. It is as important that the water for stock be pure as for human beings, and it is the former that is more frequently compelled to get their supply from unwholesome sources. Having this in mind, we feel constrained to recommend the drilled well, the machinery for which is manufactured by the American Well Works, Chicago. They also make steam pumps, air lifts, and gasoline engines, all of which are described in their D 1 circular, which will be sent by writing the firm at Chicago, Aurora, Ill., or Dallas, Texas. See their advertisement in this issue.
