

DECEMBER 8, 1910

THE FARMER'S ADVOCATE.

At a cost of only two-thirds of a cent a day per Animal, Royal Purple Stock Specific makes each Animal worth 25 per cent. more.

You never heard of any other Specific, or "Stock Food," doing likewise.

Royal Purple will permanently cure the Rots, Colic, Worms, Skin Diseases and Debility, and restore run-down Animals to plumpness and vigor.

It will increase the milk-yield three to five pounds per cow a day inside of from two to three weeks. It makes the milk richer than ever before.

MR. ANDREW WEGRICH, of Wainlett, Ont., says: "This is to certify that I have tried your Royal Purple Stock Specific for two weeks, on one cow. On the 16th I weighed her milk as 17 pounds. I noticed a change after 5 or 6 days, as there was an extra weight of milk. On the 29th, I carefully weighed the milk, and she gave 22 pounds. I am giving an order for 5 boxes, as I consider it the best I have ever used."

"Stock Food" will not do this. Because "Stock Food" is nothing more or less than a mixture of the very things which you, yourself, grow on your own farm.

It is not more food your Animals need. They must have something to help their bodies get all the nourishment from the food they are getting. So that they will fatten, and stay fat, all the year 'round.

They need something to prevent disease, to cure disease, and to keep them in the best of health, all the time.

Not a Stock Food

Royal Purple is not a "Stock Food," nor a "medicine." It is a Conditioner.

It does not contain Grain, nor farm products. Nor does it contain "Dope," or any other injurious ingredient. Royal Purple does not merely temporarily bloat or inspire the Animal. It fattens and strengthens it, permanently.

No other Specific known adds flesh so quickly as Royal Purple. It makes 6-week-old Calves as large as ordinary-fed Calves are at 10 weeks.

Royal Purple makes naturally thin Animals fat.

and heavy. And it builds up the health and restores the former plumpness and vigor of run-down stock, in little or no time.

The very best time to use this Conditioner is NOW. It digests the hard food properly and prevents the animals getting indigestion or losing flesh.

50 per cent. Cheaper

One 50-cent Package of Royal Purple will last one Animal 70 days. This figures a little over two-thirds of a cent per day.

Most "Stock Foods" in 50-cent Packages last but 50 days, and are given three times a day.

But Royal Purple Specific is given only once a day, and lasts 50 per cent. longer.

A \$1.50 Pail containing four times the amount of the 50-cent Package, lasts 280 days.

So, you see, it is only necessary to give Royal Purple Specific once each day.

Just think of making each Animal worth 25 per cent. over its cost! What will that mean to you, Mr. Stock Owner?

Royal Purple

STOCK AND POULTRY SPECIFICS

Royal Purple creates an appetite for food, and helps nature to digest and turn it into flesh and muscle.

As a Hog fatterer, Royal Purple has no equal.

Never Off Feed

Dan McEwen, the horseman, says: "I have used Royal Purple Stock Specific persistently in feeding 'The Fel,' 2-021, largest winner of any pacer on Grand Circuit in 1908 and 1909, and 'Henry Winters,' 2-104, brother of 'Allen Winters,' winner of \$30,000 in trotting stakes in 1908.

"These horses have never been off their feed since I started using Royal Purple Specific. I will always have it in my stables. Your Cough Powder works like magic."

For Poultry

Royal Purple Poultry Specific is our other Specific. It is for Poultry—not for stock.

It makes the Hens lay Eggs in Winter as well as in the Summer.

MRS. WM. BURNHAM, Sanford, Ont., says: "Dear Sirs, This is to certify that I have used two boxes of your Poultry Specific for my hens. They laid so well while feeding it to them, I wondered if you would mind sending me word how or where I could get some this winter. I bought it from your agent last winter. I had 32 hens, and some days I got two dozen eggs a day in February and March, while feeding them the Specific."

Royal Purple Poultry Specific prevents Fowls losing flesh at moulting time, and permanently cures every poultry disease. It makes their plumage bright and keeps them always in prime condition.

It makes your Poultry worth more than they could ever be without it.

Yet one 50-cent Package will last 25 Hens 70 days. Or a \$1.50 Pail will do 25 Hens 280 days. This is four times more material at only three times the cost.

Make This Test

Every ounce of Royal Purple Stock and Poultry Specific is guaranteed.

To prove that Royal Purple has no equal, we want you to make this test:

Feed Royal Purple to any one of your Animals for four weeks. And at the same time feed any other preparation to any other Animal in the same condition.

If Royal Purple does not prove to you, by actual results, that it is the best you ever used, we'll return your money.

And we'll ask no questions—make no excuses. You will be the judge—not us.

This is an honest test, isn't it? We ask you to make it because we know that Royal Purple is the best Conditioner on the market.

If you are not satisfied, after testing it, you don't lose anything, do you?

W. A. JENKINS MFG. COMPANY, LONDON, ONTARIO

GOSSIP.

CEBARDALE SHORTHORNS.

This old-established herd of Scotch and Scotch-topped Shorthorns, the property of Dr. T. S. Sproule, M. P., of Markdale, Ont., was never so strong as just now, headed as it is by the straight-lined, good-doing and richly-bred son, Imp Lord Fyvie, a red three-year-old son of Primrose Fancy, by the \$1,600 bull, Primrose Prince, dam Minerva 11th, by the Friesian bull, Fortune, grandam by the Lady Vesper bull, Justicus. Prominent among the Scotch-bred cows is the big, black, Imp. Claret 3rd, by the Goldie-bred bull, Spicy King. This cow has a nice bull calf, by the stock bull, that should make a very desirable herd-header. There are also two daughters of hers, one and two years of age, the oldest by the 'big' grand champion, Imp. Prime Fawn, the other by the stock bull; a straight pair of heifers worth looking at. They are for sale. Another notable cow is Martha 7th, a Miss Fawn, by the Maer Roan Lady bull, Imp. British Pride, dam Imp. Martha 4th, by Spicy King. Out of her, for sale, an extra straight, even young cow, by the stock bull. The other breed-

ing cows are Scotch-topped, tracing to such notable founders of the breed in Canada as Flora (imp.) 190, Beauty (imp.) 30, Margaret (imp.) 317, and Lady Jane (imp.) 281. From such well-known dairy-bred Shorthorn breeding as this, there are for sale a number of heifers and one eleven-months-old roan bull, by the stock bull, also a couple of younger ones. Some of these are out of dams sired by Imp. Choice Koral. The well-known reputation of Dr. Sproule, for straight dealing, is a guarantee to correspondent purchasers of an honest representation of the animal described.

Volume 19, of the Canadian Ayrshire Herdbook, has been issued from the office of National Live-stock Records, Ottawa. This is one of the largest volumes of the series, containing 317 pages, and the pedigree records of 2,116 animals, numbered from 27637 to 29753, also the being from 27637 to 29753, also the constitution and by-laws of the Association, list of officers, scale of points, rules of record, list of performers, list of members, transfer and numerous excellent illustrations of notable animals of the breed, which is rapidly gaining favor in Canada.

The first annual meeting of the Maine State Breeders' Association was held at Waterville recently, the session lasting two days, proving both interesting and profitable. A little less than a year old, the society has made a place for itself in the economy of the live-stock industry. Among the things undertaken during the time are, taking action against selling stallions on the syndicate plan; asking fair associations to abide as closely as possible to advertised rules for judging, to make live-stock judging as prominent a feature as possible; to provide facilities for interested spectators, and to provide better accommodations for cattle and their attendants, licensing dairy and beef bulls, and stallions, preventing the spread of contagious abortion, working for laws to increase the appraised value of pure-bred stock; to increase the use of the tuberculin test, having the cattle commission slaughter some tuberculous animals at fairs for educational purposes, encouraging breeding by judging contests at fairs, and encouraging more local testing and breeding associations.

"Is there any soup on the bill-of-fare?"
"No, sir, there was, but I wiped it off."

From some examination papers in a Massachusetts—we repeat, Massachusetts—town:

"Capillarity is when milk rises up around the edge of the bottle and shows good measure."

"The settlers gave a Thanksgiving dinner to the Indians for their kindness, and to the Lord for fair weather. They kept up their festivities for three days, eating all the time. A party of sixty Indian warriors came, rolling their war-whoops down the hill."

"Henry VIII, by his own efforts, increased the population of England 40,000."

"Esau wrote fables, and sold them for potash."

"The Lupercal was the wolf who suckled Romeo and Juliet at Rome."

"Lincoln has a high forehead, which is a sign of many brains."—Everybody's for December.

A complete Kitchen Equipment (six articles), or a Set of Scissors (three pairs), can be obtained by sending in one new yearly subscription to "The Farmer's Advocate" and Home Magazine." Look up the particulars in our premium announcement elsewhere in this issue.
