

A COMPRESSOR BARGAIN

We offer for immediate shipment the 450 cubic foot compressor illustrated. Due to the existing business conditions we are over stocked in this size and in order to realize on some of these machines we are willing to name a very low figure to any bona-fide inquirer who is interested in a compressor of this capacity.

This is a well-known Rand type, largely used in mining and contracting. This machine has been tested and is now on the erecting floor ready for shipment.

It must be moved at once.
