

SAFETY MINE CAGES

MADE TO FIT YOUR SHAFT

We build these Cages to suit you and your workmen. They are Safe, Strong, and Reliable.

We guarantee the Safety Device of our Mine Cages to be quick and positive in its action. It can be relied on to work and to hold the cage safely at any time in case of accident. The springs are strong, the dogs are properly designed and adjusted, and the whole device is made amply strong for any emergency.

If you do your part by keeping the timbers in proper condition, and the bearings lubricated and reasonably free from rust, the Safety Device will do its work every time.

We supply these cages with either one or two sets of doors for inlet or exit, to suit your shaft.

Rails are also laid in the floor, if required, for convenience in handling the cars.

The top doors permit the carrying of long timbers, or the escape of the men in case of accident.

The hand rails are properly placed to safeguard the passengers in the quick ascent or descent.
