NICKEL DEBATE IN LEGISLATURE

Resolution Looking to Government Control of Industry Voted Down.

Toronto, April 4.—For nearly five hours yesterday the Opposition in the Legislature held forth on the nickel question. Not satisfied with a two day spell of it last week in discussing nickel taxation, they came back with a fresh move—this time a resolution calling upon the Government to take steps to control the production and distribution of nickel, and for a conference between Provincial, Federal and Imperial authorities to that end. Sam Carter of South Wellington started it, and before the supply of oratory was exhausted late in the evening half a dozen members of the Opposition had taken a hand in it. As might have been expected, the resolution was voted down. The Government did not even offer an amendment. The vote was taken after Hon. G. Howard Ferguson, Minister of

Lands, Forests and Mines had clearly explained the position of the Government. The Minister's reply emphasized three important points—that until a method of economically refining nickel in Ontario is discovered the purchase of the nickel-producing industry in Ontario would be impossible; that the Government hopes, from the investigations now being carried on by the Nickel Commission to solve the problem and open the way for dealing with nickel in the province from the mine to the finished product; and that the British Government does not desire provincial ownership, and is now absolutely satisfied that not a pound of nickel from the International Nickel Company plant in the United States is now reaching the German Empire.

The waste paper basket in some offices is emptied once a day, sometimes twice a day. Besides scraps of paper and envelopes it usually contains many circulars addressed to the man who seldom opens them.
