

GONDUCTED BY PROF. HENRY G. BELL The object of this department is to place at the ser-vice of our farm readers the advice of an acknowledged authority on all subject pertaining to soils and crops. Address all questions to Professor Henry G. Bell, in care of The Wilson Publishing Company, Limited, Toron-to, and antwers will appear in this column in the order in which they are received. When writing kindly men-tion this paper. As space is limited it is advisable where immediate ropiy is necessary that a stamped and ad-dressed envelope be enclosed with the question, when the answer will be mailed direct. Copyright by Wilson Publishing Co., Limited N A. J have four on the arms of would therefore our

N. A.: I have four or five acres of would, therefore, advise as follows land which is quite heavy clay. It has been plowed and has been in pasture for about fifteen years, quite heavy June sod. What would be the best immediately after plowing. Next get, so to speak, and bec crop to plant next Spring, so I could sow it to wheat in the Fall of 1922? about a bushel to the acre, and at the When would be the best time to plow same time seed with a mixture of it and how many inches deep should it common red and alsike clover, about be plowed? 10 lbs. of the former and 4 lbs. of the

Answer: The answer to your queslatter per acre, or about 12 to 15 lbs. tion will depend to some extant upon per acre of sweet clover. your location. If you are in the sec-tion where corn matures, an early available plantfood to get the legumes crop of corn can be grown and cut growing, apply about 300 lbs. per acre silage sufficiently early to allow of a fertilizer carrying about 3 per the ground to be plowed and worked cent. ammonia, 8 per cent, phosphoric up for fall wheat in the autumn of acid and 3 per cent. potash. This 1922. If you are not in the corn belt should give the grain crop and grass would advise growing a mixture of a good vigorous start. If the legume barley and oats, about a bushel of make an abundant growth, cut the each to the acre, which could be cut first crop and turn the second one for mixed grain. As soon as the crop under in order to build up the humus is harvested, have the ground plowed of this soil. immediately from 5 to 7 inches deep and worked up for fall wheat. At the time you seed the fall wheat it will pay you to add additional available antfood in the form of about 250 to plantfood in the form of about 250 to 800 lbs. of fertilizer per acre. For the soo hs. of fertilizer per acre. For the fall wheat on your heavy clay I would advise using an analysis running about fair distribution of the fungicide. fruitful according to the need of their The function of the fungicide. fruitful according to the need of their 2 per cent. ammonia, 12 per cent. During the early growing period of phosphoric acid and 1 or 2 per cent. the potato, however, if you want a

R. S. A .: Would I get as good results from applying acid phosphate to the top surface and dragging it in as I would if I used a fertilizer drill?

Answer: Best results will be gotten from acid phosphate if it is worked into the soil as is done by application through a fertilizer drill. The whole object is to get the phosphate distri-buted through the moist soil as thoroughly as possible. If the soil is dry and the application is made broadcast on the surface, you will not get as thorough a distribution through the are being made at Experimental growing area as when the fartilizer Farms in British Columbia to see if such a thing is possible. These experimentations in mediately dissolve and spread ugh the soil water.

T. W .: I have a piece of ground, oats).

applied to your oats will remain very largely in the soll for next year's crop.

The Country Child's Schooling

An Answer to the Question, "How Much Education Does the Rural Child Need?"

By ADA MELVILLE SHAW.

immediately after plowing. Next get, so to speak, and because there Spring seed it to barley, putting on still exist for him handicaps so great,

every opportunity, each doing our best stately homes, the convents, the semi-to clear away the handicaps for as naries, the orchards and gardens, the nany, of this generation as possible and for all who are to come along the path of citizenship via the way of the rural home and the rural school.

How much education can the coun try child take? would perhaps be the better way of putting this guestion. When the earth receives more moisture than it can care for, we have destructive or wasteful overflowflood; when it receives less than it potato vines on top, for blight, with Bordeaux; or would you have to have wasteful deprivation-drought. Our a spray that you can reach them from under the leaves? be normal. Men and women must be walk without a visible sign of fence, day. This conclusion leads us to present this question in still a third way: additional What must the country child produce in order that he may best meet the demands of his day in the place where he finds himself?

A full answer to the question, thus stated, would involve an exhaustive study of life and living as they are Whether nuts, such as walnuts, almonds, chestnuts, filberts and cobs, tutes Canadian citizenship and Cancan be grown in Canada to such an adian statesmanship, for it is not too tate either one!

ibs. of fertilizer to the acre and all I be said to be altogether conclusive. from the standpoint of condescension I want to get some clover on of the Sidney Experimental Station, daily close contact with the dirt of it and I would like to have something in a bulletin recently issued, sets forth the field, the barn, the chicken yard, to cut for hay next year also. Can I what has already been accomplished, the hog pen, or, from the standpoint sow timethy and clover this Fall, or and at the same times describes the of the farmer as a comic or picturjust the timothy and sow the clover in the Spring? What can I do to get a

The Sunday School Lesson SEPTEM BER 25

Review. Golden Text-Galacians 6: 10.

By ADA MELVILLE SHAW. To the broad-minded and far-seeing educator, there can be but one answer to 'be question: How much education does the rural child need? It is pro-verbial that children and fools tall the youd capacity—and some of them be-youd capacity—and some of them the question to an exceptionally bright school boy. He considered a moment, gave me a swift glarce of near-scoor and hurled at me his con-clusson, final and all he could be can get!" I might conclude by dropping the to chear away the handicaps of reat, a that while the friends of clucation are back this point as full y covered by many of him grow up, suffer and look the do cluston the du all be could a stress and that all these and the scales he be consets the champion of a broad human. I might conclude by dropping the to the scale there all the could the scale thread the scales as financical success—a success that will work as a financical success—a success that will work as a sill of local politics. I believe I an the du city where I was born, this still argue and preach and plead, at every opportunity, cach doing our best still argue and preach and plead, at every opportunity, cach doing our best still argue and preach and plead, at every opportunity, cach doing our best still argue and preach and plead, at every opportunity, cach doing our best stale of the bandicas as financical stale write the end city where I was born, that stale the state, the orchards and stare, the orchards and stare woon sciences to be finances and walls were more essential to safet. the odd city where I was born, that the as far as wy a for the farm wall where, the orchards and stare woon of the farmes and fool of the folly of the the of workshop, some open and willing ears glad to receive so great a message. But we see also jealous and hostile faces, Jews that cannot endure to hear that the future age of salvation of which they dream is to be for the Gentile as well as for the Jew, and Gentiles who are offended when told of the folly of their idel working whether had

faith and following of Jesus Christ. The story of Paul's life as far as we have followed it will be a fascinating subject for review. We see him first as the carefully educated child of a good Jewish home, in the schools and university of his native city of Tarsus, learning the mathematics and the philosophy of his time, the Hebrew

In fight to narrier cities and new places of toil. Paul's life becomes to us a great example of unselfish toil, a living sacrifice. He gives himself wholly to his task. He has become, he confesses, the bend slave of Jesus Christ. He lives only to proclaim the love and saving Green of Lewis Christ. the bend slave of Jesus Christ. He lives only to proclaim the love and saving grace of Jesus Christ. Or, as he himself wrote, "For me io ligt is Christ." And he believed that, in all his toil and sacrifice, Christ was with him. "Never forget," writes Paterson Smyth, "that inner secret of Paul's life, the constant realizing of the close presence of his Lord. The whole value of this biography is lost if we forget Christ in thinking of His servant; if in admiring his faith and courage and endurance we loce sight for a moment In admiring his faith and courage and endurance we lose sight for a moment of the secret of it all. He lived in Christ's presence. Behind, over the heads of priests and governors and howling mobs, he could always see Jesus. He sought only his approval He knew Him for his friend in life or in death." or in death."

Application. Paul's own experiences give point to the exhortation with which the lesson for to-day begins. He knew what it was to be overtaken in a fault. Right was to be overtaken in a fault. Right in the midst of a career of persecu-tion he had been smitten to the ground and convicted of his sin. It was when humbled and chagrined, blind and conhumbled and chagrined, blind and con-fused, that a messenger of Jesus came to him, calling him "Brother Saul," and leading him out into liberty. Again, when he went to Jerusalem, filled with remorse for his past actions and seeking to atone by redoubled zeal on behalf of the church, he was met with suspicion and disbelief by "all" but one man, Barnebas, who had faith to believe that Saul had been convert-ed and not only took his part then, ed and not only took his part then, but afterward, having a special piece dewish communities in the islands of the Mediferranean sea, and all about its coasts, seem to invite them to come. Their knowle ge both of He-brew and Greek makes it possible for him, we may do for others.
