Product and Provisions.

(From Saturday's Trade Review.)
Cedish—The exports this week totalled 50,741 quintals as follows:
From St. John's—By S.S. Rein 21, 377 qts. to Alicante and Naples from various shippers and by S.S. Silvia 1,567 qts. to West Indies via New York and Halifax from different shippers.

From Outports—By schr. Eva, W. 2 J. Moore Carbonate, 3,510 qts. to Alicante; by schr. Review from Paragar & Co., Bonne Bay, 1,417 qts. to Halifax; by S.S. Kilton, from U.S. Export Co., Templeman and Jan. Ryan 17,850 qts. to Alicante; by schr. Rbel M. Bartlett from Burn Export Co., Burn, 2,300 qts. to Oporto, and by schr. A. B. Francis, Chantrel 431 qts. from W. Howard and E. Pike to Halifax. The market is weak, and it is feared that prices are not going to keep up to the level that prevailed since the new fish season opened. It looks now as if those who sell early this fall will do best.

Cod Oil—There has been fairly active enquiries and business in cod liver oil at moderate quantities. Dealers are not prepared to speculate with a view to any advance in prices, but they have an idea that trade is improving and that a considerable quantity of oil will be wanted. The market remains steady with an occasional bid at two or three dollars per ton over the regular price to fill immediate orders. Price \$115 to \$120 per ton. This week 41,613 gallons were exported.

Cod Liver Oil—We hear of many enquiries from parties interested in this commodity and its kindred products on foreign markets. They are anxious to get information regarding the investigation of the scientists who were with us recently. We have no hesitation in saying that before has cod liver oil required such attention from outside sources. We are living in a wonderful age and what took a lifetime to develop in former times may prove an established industry at short notice. There is an over-supply of cod liver oil as we know it to-day and none selling except at very low prices just now. Buyers are looking for the new product that is expected from the result of these investigations, but they must wait patiently for reports of the British Research Council of London.

Duckworth Street & Queen's Road

Molasses—The market is quiet at Barbados, quotations having advanced 68 to 72 cents per imported gallon wholesale according to size of casks. The schooners Port Union and Annie L. Warren and Novelty are now enroute to Barbados, one of which will load molasses for Newfoundland. The Donald II. is also there loading. The total imports to date are 3,065 puncheons, which is 4,000 puncheons in excess of last year's record at a corresponding date. The local prices are unchanged at 80 cents per gallon for fancy and 70 to 75 for choice wholesale.

Sugar—The sugar situation is unchanged here, quotations being quoted at \$11.60 per 100 lbs. wholesale. The New York market is somewhat irregular this month both as regards refined and raws. In Montreal when prices seemed on the upturn for permanency some wholesalers bought extensively, but when the market reacted they were to be found under the regular quotations of \$12.50 per 100 lbs. for standard granulated. None arrived here last Monday when the S. S. Sable I. landed 500 sacks, 250 barrels and 250 cases. The imports are roughly 70,000 hundredweight to date as compared with 45,000 hundredweight last year.

Potatoes—The local crop has improved greatly since September came in, and fortunately there has been no frost sufficiently heavy to do injury to the crop. In past seasons early frosts have destroyed promising crops. The potatoes are now maturing well in dry weather, which should result in well-flavored, sound potatoes. The home crop will probably be a record this fall, and it will not be necessary to import so heavily as usual. The price of home grown is now \$4.00 per barrel and \$2.00 per half barrel. Island potatoes will not be in till October.

Onions—Steady at \$2.50 a case. Bananas 13 cents a pound. Grapes \$2.75 to \$3.00. Cheaper later, market now rather clean.

Oats—The oats market is still declining in sympathy with grains. White oats are selling here for \$3.90 per sack and mixed \$3.60. Importers are getting along well for the immediate requirements in anticipation of lower prices later. There is only sufficient coming in to supply present needs. The bottom prices will be quoted when the harvesting is completed about the first week of October. Large importations will then likely come forward by direct Montreal boats thus ensuring low priced oats the coming winter.

Hay—The Canadian market continues weak and local importers are still holding back from ordering large quantities expecting more favorable prices. The market is not settled, which accounts for the small movement in hay. The S. S. Mahoe brought in 400 bales from Montreal this week. The local wholesale price is \$40.00 per ton and 2 1/2 cents per lb. by the bale. Very little hay is sold except to city horse owners. Local farmers have their hay stored in barns and barns for the winter. The home crop was 100 per cent. over last year's yield, therefore, imports this fall will be lighter than for many years. It is regrettable that we should have to import any.

Dried Fruit—Currants were offered cheap during the months of July and August but owing to the recent demand the price has advanced 1 and a half per pound at which price currants are held very firm. Thompson seedless raisins are selling here loose in 25 pound boxes at 23 cents per pound and in one pound packages at 24 cents. Seedless Raisins in 35 pound boxes made up in one pound packages at 20 cents per lb. Spanish raisins in 22 pound boxes at 25 cents.

Just Folks

By EDGAR A. GUEST.

SEPTEMBER.

There's a sweater on the sofa, and a cap upon the chair.
A bicycle is on the lawn, his skates are on the stair;
I can't get up the driveway for his wagon's in the track.
The house is topsy-turvy, but I'm glad that he is back.

The morning paper's scattered, for he's read the funnies through,
His shoes are on the sofa, and the radio sings anew.
Round the porch from dusk to twilight there's a shouting, romping pack
Of lusty, healthy youngsters, but I am glad that he is back.

Oh, the house was strangely silent, and the rooms were trim and neat.
And there've been no shouts of tumult rising upwards from the street,
I could whine into my driveway at the ending of the day
And never find a wagon or a plaything in the way.

But the house shows signs this morning, that a healthy boy is here,
The rooms are in disorder, and my toilet all disappear.
I cannot find the hammer when I want to drive a tack.
Now the house is topsy-turvy, but I'm glad that he is back.

Tanlac Demand is Greater Than Ever in History

Modern Plants Have Increased Capacity of 62,240 Bottles a Day But Makers are Still Behind Orders—Medicine Publicly Endorsed by Best People Everywhere.

During the first seven months of this year 3,534,000 bottles of Tanlac have been sold and a new world record for a proprietary medicine is established.

More than 30,000,000 bottles have been sold during the eight years that it has been before the public, and it is the largest selling medicine of its kind does not begin to tell the story. No other preparation has ever approached the demand enjoyed by Tanlac, and it is expected that the sales this year alone will be more than ten million bottles.

Working diligently to full capacity the three modern laboratories at Dayton, Ohio, Walkerville, Canada, and Mexico City are still having to order, in spite of the fact that the combined output has been increased to 62,240 bottles a day. While the labor of great striving for quantity production this endeavor is still secondary to the determination to make no sacrifice whatever that will endanger the high quality of the medicine.

Tanlac's wide-spread and ever increasing popularity is the strongest possible proof of its effectiveness. No product, no matter how extensively advertised, could continue to establish world records for sales year after year if it did not produce actual and positive results.

Tanlac is composed of the most beneficial roots, herbs and barks known to medical science. The formula is ethical and conforms to all pure food and drug laws, and although Tanlac's superiority is abundantly supported by leading authorities it is the people themselves who have made Tanlac what it is. Millions upon millions have used it and have told other millions what it has done, while thousands of the best people in every community have given public statements of the great benefits they have received by taking it.

Tanlac is sold by all good druggists.

Young Lady Loses Life

WHILE TRYING TO SWIM ACROSS RIVER NEAR GEORGIAN BAY.

TORONTO, Sept. 12.—While trying to swim across the Wasaga River near its outlet in Georgian Bay, Miss Lena Pusley, Toronto, a student at McMaster University, lost her life yesterday. There was a heavy rain and the young lady apparently found herself unable to cope with it. A younger sister, Helen, who was also bathing in the river, made an attempt to rescue her by going out in a canoe, but was unable to do so. The body was recovered.

At the Yarnmouth Y.M.C.A. Boys' Camp, held at Tricket Falls in August, I found Mike's ailment most beneficial for sunburn, an immediate relief for colds and toothaches.

Alfred Stokes, General Sec'y.

How Electricity Helps Divers.

A new invention has come to the aid of divers who save sunken ships, in the shape of an instrument for cutting through metal plates under water.

The instrument cuts by means of a small but intensely hot electric flame that travels slowly along the submerged plate, melting the metal that comes in contact with it.

Although working in water, the electric arc flames almost a way through the iron as easily as a knife passes through butter.

Now the Tool Works.
Down the stem of the tool run a couple of thin tubes through which gas is forced. This gas does not burn but performs the work of driving the water away from the tips of the arc and, further, for blowing the molten metal to one side as it is cut through.

When the diver descends to a wreck he marks the iron plate where he wishes to cut it, and then brings his torch into play, the point of the arc slowly moving along the marked line.

The moment the tool is brought to bear, the arc is switched on, and at the same time the gas flows out of the two tubes, so that the hot flames are actually burning in a little pocket of gas.

Salvaging a Ship.

In this way iron or steel plates are cut as rapidly as if they were in open air—a vast improvement on the old method of sawing, or the still more unsatisfactory method of blasting.

While in New York Harbour the British ship Lord Dufferin was named. She sank immediately, with sixty-five feet of stern cut off.

At first she offered considerable difficulty to the divers, as a great piece of her steel hull had been bent, and had driven deep into the mud.

DON'T MISS THIS GREAT CLEARANCE SALE DISCONTINUED LINES BOOTS & SHOES!

We simply do not want to carry broken lines of shoes from season to season, and have priced many of these to less than a third of their original value. Our object in doing this is to reduce our stock to the lowest point possible, in order to make room for Fall Footwear.

You are now face to face with the greatest Shoe Buying Opportunity at
