

WATE'S BLUSH, is of medium size and very beautiful appearance; form roundish, flattened at the ends; color bright yellow, with a rich, almost scarlet cheek on the sunny side, stem short and very slender, inserted in a deep, regular cavity; calyx closed, in a very shallow, wrinkled basin. Flesh yellow, very fine grained, juicy, sprightly sub-acid.

WAUPACA.—A most magnificent looking apple, of very large size, conical in form, skin yellow and slightly russeted, nearly covered with bright red, and profusely sprinkled with russet dots. Stem very short, stout, and set in a broad deep russeted cavity. Calyx open, segments upright, basin deep, almost perpendicular, regular, and moderately corrugated near the bottom. The whole appearance reminds one strongly of the Blenheim Orange. Flesh yellowish white, not fine grained, with a rich, pleasant, mild sub-acid flavor. Core remarkably small. Season is probably not beyond November.

HUBBARD.—This variety is of medium size, somewhat conical in form; skin yellow, overspread with red on the sunny side, sprinkled with numerous small gray dots. Stem slender, medium length, set in a deep regular cavity. Calyx nearly closed, segments erect, basin shallow and regular. Flesh yellowish, very fine grained, juicy, rich, sub-acid, quality very good. Seems to be a good winter sort.

WEYAUWEGA.—A very handsome, large, regularly formed apple. Skin yellow overspread with red, striped and splashed with deep red. Stem short, inserted in a narrow, regular, moderately deep cavity; calyx closed in a broad shallow regular basin. Core small, flesh white, very fine grained, juicy, with a pleasant mild sub-acid flavor. This is a good keeper.

RICH'S GREENING is large, nearly conical in outline; skin at this date (1st November,) a clear bright deep green; stem stout and short, inserted in a narrow, regular, not very deep cavity; eye closed, in a very shallow, slightly wrinkled basin. Flesh very fine grained, yellowish, juicy, rich sub-acid. This variety is evidently a long keeper, and it is not possible to say what will be its flavor at maturity.

EDITHA is also large and very pretty in appearance. Skin light, yellow with a warm rosy cheek, thickly sprinkled with light gray dots. Stem inserted in deep, regular cavity; eye closed, basin shallow, regular and smooth. Flesh white, fine grained, juicy, mild sub-acid, not high flavored.
