## Direct Current Railway Motors

### Some Late Designs

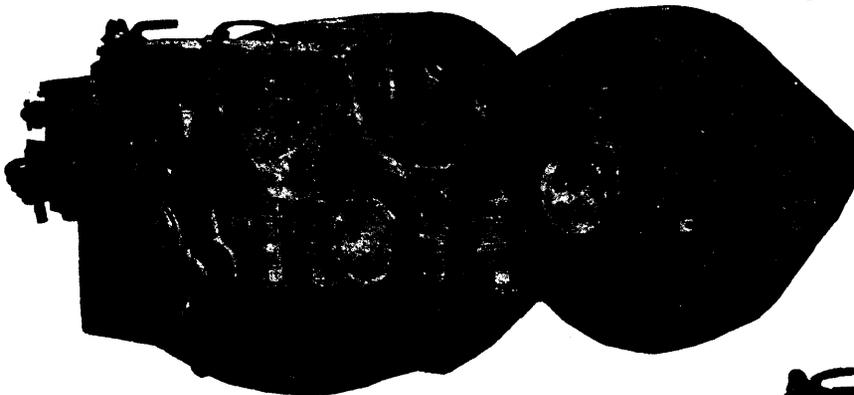

No. 92-A  
For City and Suburban Service

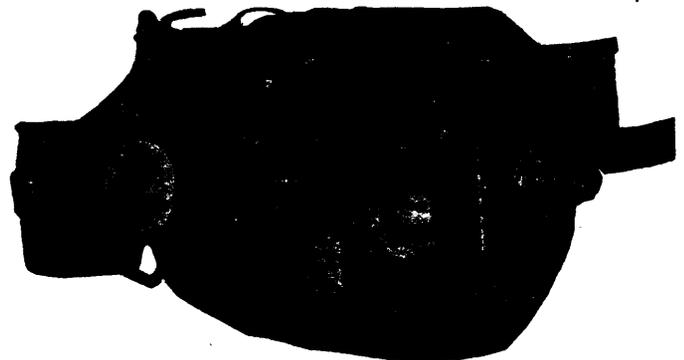

Westinghouse Railway Motors are manufactured in various sizes and types, each possessing individual characteristics especially applicable to service of a particular class.

No. 93-A  
For City, Suburban and Interurban Service

No. 101-B, with Gear Case  
Embodies all late modifications and improvements

No. 112  
For High Speed Suburban and Interurban Service

The following features are common to all these motors:  
Strap wound, fire-proof field coils.  
Armatures and commutators built on spiders.  
Wool waste oil lubrication.  
Extra heavy shafts.  
Large and long armature and axle bearings.
