Ames & Co., Toronto, The list of provincial directors contains the names of many leading men in financial and commercial circles who are known throughout the Dominion.

DANGERS OF ELECTRIC WIRES.

DANGERS OF ELECTRIC WRGS.
An electric wire in the Hudson's Bay
Co.'s store. Winnipeg., came in contnet with a gas pipe. The electric current hurnt a hole through the pipe,
and the gas which streamed out was
soon in a blaze. The damage done was
slight, though the fire department
was called out, so serious did the matter look. This pecured on Monday
morning. Hau it happened when the
store was closed and no one present,
another mysterious and probably disanother mysterious and probably dis-

astrons fire would have been the result. There certainly would seem to be great need of some close system of inspecting electric wires. They are no doubt the cause of many mysterious

INSURANCE NOTES.

The fire, water and light committee of the Winnipeg city council have rerommended the appointment of an inspector of electric light wires in build-

Wm. McCabe, maining director of the North American Life, spont a few days in Winnipeg and was greatly pleased with the apparent prosperity prevailing here. He went west the first of the week accompanied by Mr. McBride, local manager for the com-

Coming Back.

There are hundreds of residents of the west who will be pleased to hear that Mr. Joseph Tasse formerly of the Reliance Cigar Factory. Montreal, has once more started business in the manufacture of eigars, this time associated with Mr. Clovis St. Louis, the house being designated the Joseph Tasse Cigar factory, located at 29 St. Peter street, a few steps at 29 St. Peter street, a few steps from the St. Anne's market. The factory is now at work, and among other brands of goods being turned ont the well known "Flor de Bahama" so popular in this country, is receiving full attention, the new firm having segared the sele wight for Country. ing secured the sole right for Canada to make this high grade cigar. The factory is fitted up with every modern appliance for the manufacture of fine goods, and will doubtless take its fine goods, and will doubtless take its place among the leading concerns of its class in the Dominion. It is unnecessary to state that the new firm will not neglect the field in the west, and during the next few weeks Mr. Tasse himself expects to be in the country shaking hands with his old friends here, and no doubt doing a business as extensive as he did in bygroup years. This hast fact is to some gone years. This last fact is to some extent corroborative of the old saying. "Chickens come home to roost."

Canned Salmon.

The open season for packing sock-The open season for packing sockeye salmon (the principal packing variety) closel on the Fraser river on Thursday. The pack has been a failure, amounting, it is said, to less than 200,000 cases. The cauners decided not to ask the government for an extension of the open season, but instead they will ask that the season for packing cohor salmon be opened ten days earlier than usual. The pack of the latter variety is not unusually large. Last year the total Fraser river pack was \$40,000 and the total river pack was \$40,000 and the total British Columbia pack, including other rivers, was 1,040,000 cases. The Fraser river pack this year will be the smallest since 1882, when it was \$0,215 cases. In other years since 1882 the pack has ranged from 357,000 to 457,000 cases.

A Winnipeg broker representing one of the principal packers has received word that his company will fill only 50 per cent of the orders taken, the orders having been taken subject to pack, and instructions have been given to stop selling. Packers who have any salmon to sell now, will hold the goods very firm. A Winnipeg broker representing one
