

Do You Cough?

It is a *sure sign of weakness.*
You need more than a tonic.
You need

Scott's Emulsion

the Cream of Cod-liver Oil and Hypophosphites, not only to cure the Cough but to give your system real strength. *Physicians, the world over, endorse it.*

Don't be deceived by Substitutes!

EXERCISE IN COMPOSITION.

WRITE the following sentences so as to form a continued narrative:

A fish lived in a large pond. He was a careless fish. He was not a year old. He was quite large. He could swim faster than his brother and sister fishes. He knew all the cool, shady spots. The flies came buzzing over the water. He would spring and catch them. He would eat worms, too. His mamma warned him about the hooks. (Tell what she said.) One day he saw a worm. He saw the hook. (Tell what he thought.) Took hold of the end of the worm. The worm began to move away. (Tell what the fish said.) The fish gave a jump. The fish felt something sharp in his mouth. He swam this way and that. He went out of the water. And came down in a boat. That was the last of him.—*Georgia Teacher.*

BY

S. R. CROCKETT.

CLOTH, \$1.25.

OUR handsomely bound Canadian Copyright Edition of this brilliant production of a new pen is being taken up rapidly. In England the book has already passed into a fifth edition. It has earned a place among the "immortals" of our English literature, and placed its author in the very front rank of living writers. Robert Louis Stevenson enthusiastically commends it. Now sparkling with quiet, delicious humor, again tender with a pathos that sounds the very depths of the heart, it offers all the charms that win for a book not only the admiration but the affection of the reader.

You cannot afford to miss it. For sale by all Booksellers.

SIXTH EDITION

—OF—

Arithmetical Problems

—FOR—

Senior and Entrance Classes
in Public Schools,

—BY—

G. H. Armstrong, Principal Niagara Street School, Toronto.

This edition contains nearly 900 Problems. The Entrance Papers for the last *twelve years* are appended, also the Public School Leaving Examination Paper for 1892. The answers to all the Problems are given. No other work possesses these features. Seventy-five per cent. of the Public Schools of Ontario use it, also several Commercial Colleges.

READ WHAT TEACHERS AND INSPECTORS SAY OF IT:

I am highly pleased with your Arithmetical Problems for Senior classes. It suits my Entrance candidates exactly. A book such as this is needed by every Fourth Class pupil.—GEO. KRICK, Head Master M.S., Chatham.

I have just examined your Arithmetical Problems for Senior classes. The problems are very suitable and the collection must prove very valuable to teachers. I heartily commend it.—G. D. PLATT, B.A., P. S. Inspector, Prince Edward.

After a careful examination of your "Arithmetical Problems for Senior Classes," I find them well graded and very suitable for the purpose intended. The teacher who uses them for home or class work, will save himself a vast amount of labor, and in all probability secure to his pupils much better results.—J. S. DEACON, Inspector, Halton.

I have no hesitation in saying that for the purpose for which it is intended the work is infinitely the best with which I am acquainted. Its strong point, to my idea, is the logical, sequence in the problems by which the pupil is almost insensibly led on step by step until he reaches quite a difficult style of question. The printer, too, has done his work very well, and there are but few typographical errors. I shall certainly recommend every teacher in my inspectorate to use a copy.—J. C. MORGAN, M.A., Inspector, Barrie.
